About ReShape Lifesciences Inc.

ReShape Lifesciences is a medical device company focused on technology to treat obesity and metabolic diseases. vBloc® Neurometabolic Therapy, delivered by an FDA-approved pacemaker-like device called the vBloc System, is designed to help patients with a Body Mass Index (BMI) of 40-45, or 35-39.9 with a minimum of one related comorbid condition, feel full, eat less and lose weight by intermittently blocking hunger signals on the vagus nerve. The FDA-approved ReShape® Integrated Dual Balloon System involves a non-surgical weight loss procedure that uses advanced interconnected balloon technology designed to take up room in the stomach to help people with a 30-40 BMI, and at least one co-morbidity, lose weight. The Gastric Vest™ System is an investigational, minimally invasive, laparoscopically implanted medical device that wraps around the stomach, emulating the gastric volume reduction effect of conventional weight-loss surgery, and is intended to enable rapid weight loss in obese and morbidly obese patients without permanently changing patient anatomy.
