

Fidelity National Financial Announces Proposal To Acquire FNIS

Irvine, Calif. -- (May 23, 2003) -- Fidelity National Financial, Inc. (NYSE: FNF), a Fortune 500 provider of products, services and solutions to the real estate and financial services today submitted a proposal to the Board of Directors of Fidelity National Information Solutions (NASDAQ: FNIS) to acquire all of the outstanding stock of FNIS that FNF does not currently own. FNF currently owns approximately 66 percent of the outstanding stock of FNIS.

Under the terms of the proposal, each share of FNIS stock would be exchanged for a fixed share exchange ratio of 0.644 shares of FNF common stock. Based on the closing price of \$36.65 for FNF's common stock on Thursday, May 22, 2003, the implied per share consideration is \$23.60 per share of FNIS common stock. This exchange ratio represents a 24 percent premium to FNIS stockholders based on the closing price of \$19.02 on Thursday, May 22, 2003 and is equal to the relative stock price differential over the trailing twelve-month period. The fixed exchange ratio of 0.644 does not reflect the 5 for 4 stock split payable to FNF shareholders on May 23, 2003. The fixed exchange ratio would be 0.805 after the effect of the 5 for 4 stock split. FNF would issue approximately 8.5 million new shares of FNF stock to holders of FNIS common stock, or 10.6 million new shares after the effect of the 5 for 4 stock split.

The proposal is subject to certain conditions, including satisfactory completion of due diligence, negotiation of a mutually satisfactory merger agreement and receipt of all required governmental approvals and other consents. Closing of the proposed transaction would also be contingent upon FNF stockholder approval of the authorization and issuance of the shares of common stock required to complete the transaction.

"With FNF's recent acquisition and the formation of Fidelity Information Services ("FIS"), we believe it makes strategic sense to fully integrate FNIS back into FNF," said Raymond R. Quirk, President of FNF. "FNIS can better capitalize on the significant technology resources of FIS and we can provide more cohesive technology solutions to our customers by combining all our resources at FNF. Consolidating FNIS will also simplify the FNF corporate profile and allow our management team to deliver a simple, clear strategic vision to the investment community. We also believe that FNIS' public shareholders will benefit from the opportunity to share in the expected future growth and success of FNF."
