

# **HollyFrontier Corporation Reports Quarterly Results**

DALLAS--(BUSINESS WIRE)-- HollyFrontier Corporation (NYSE:HFC) ("HollyFrontier" or the "Company") today reported first quarter net loss attributable to HollyFrontier stockholders of \$(45.5) million or \$(0.26) per diluted share for the quarter ended March 31, 2017, compared to net income of \$21.3 million or \$0.12 per diluted share for the quarter ended March 31, 2016

The first quarter included several special items that reduced net income by a total of \$12.0 million. On a pre-tax basis, these items included a lower of cost or market inventory valuation charge of \$11.8 million, direct acquisition and integration costs of Petro-Canada Lubricants Inc. ("PCLI") totaling \$15.6 million, incremental cost of products sold attributable to our PCLI inventory value step-up of \$10.2 million, HollyFrontier's pro-rata share of Holly Energy Partners' loss on early extinguishment of debt of \$4.5 million, and a gain of \$24.5 million on foreign currency swaps related to the purchase of PCLI.

Excluding these items, net loss for the current quarter was \$(33.5) million versus a loss of \$(10.0) million for the same period of 2016. This decrease was driven by lower product sales due to maintenance at the El Dorado, Tulsa and Navajo refineries, partially offset by \$8.4 million in earnings attributable to our recently acquired PCLI operations. Production levels averaged approximately 392,000 barrels per day ("BPD") and crude oil charges averaged 371,000 BPD for the current quarter. On a per barrel basis, consolidated refinery gross margin was \$7.74 per produced barrel, a 2% increase compared to \$7.59 for the first quarter of 2016. Total operating expenses for the quarter were \$307.1 million compared to \$252.6 million for the first quarter of last year and include \$36.0 million in costs attributable to our PCLI operations.

HollyFrontier's President & CEO, George Damiris, commented, "First quarter crude rate was negatively impacted by our planned turnaround at Navajo, planned maintenance at the El Dorado vacuum tower, unplanned maintenance at the Tulsa CCR reformer, and the crude supply pipeline outage to our Woods Cross refinery. We are pleased with the results from the Navajo turnaround and the efficiency and debottleneck projects that were implemented during the turnaround. During the Tulsa outage, we were able to accelerate other maintenance and a catalyst upgrade originally planned for later this year, all of which will allow us to benefit from higher liquid yields and octane during the summer driving season. We are also encouraged by the results we have begun to see from our focused efforts to improve operations and reliability at Cheyenne; crude rate was over 48,000 barrels per day in March. With no major planned downtime until November, our refineries are well positioned for strong operational and financial performance for the remainder of the year.

We closed the PCLI acquisition on February 1st and PCLI continues to meet or exceed our expectations. Adjusted EBITDA for February and March was \$28.0 million, in line with our annual guidance range. We remain confident in our \$20.0 million per year synergy target and in the potential for significant margin uplift by increasing Group III base oil production through feedstock optimization. We are excited about our growing presence in the lubricants industry and are encouraged by our progress integrating PCLI into HFC."

For the first quarter of 2017, net cash used for operations totaled \$39.4 million including \$48.0 million of turnaround expenses. During the period, we declared a dividend of \$0.33 per share to shareholders totaling \$59.0 million. At March 31, 2017, our cash and cash equivalents totaled \$129.5 million and our consolidated debt was \$2,231.5 million. Our debt, exclusive of Holly Energy Partners' debt, which is nonrecourse to HollyFrontier, was \$991.0 million at March 31, 2017.

The Company has scheduled a webcast conference call for today, May 3, 2017, at 8:30 AM Eastern Time to discuss first quarter financial results. This webcast may be accessed at: <a href="https://event.webcasts.com/starthere.jsp?ei=1139807">https://event.webcasts.com/starthere.jsp?ei=1139807</a>. An audio archive of this webcast will be available using the above noted link through May 17, 2017.

HollyFrontier Corporation, headquartered in Dallas, Texas, is an independent petroleum refiner and marketer that produces high-value light products such as gasoline, diesel fuel, jet fuel and other specialty products. HollyFrontier operates through its subsidiaries a 135,000 barrels per stream day ("BPSD") refinery located in El Dorado, Kansas, two refinery facilities with a combined capacity of 125,000 BPSD located in Tulsa, Oklahoma, a 100,000 BPSD refinery located in Artesia, New Mexico, a 52,000 BPSD refinery located in Cheyenne, Wyoming and a 45,000 BPSD refinery in Woods Cross, Utah. HollyFrontier markets its refined products principally in the Southwest U.S., the Rocky Mountains extending into the Pacific Northwest and in other neighboring Plains states. In addition, HollyFrontier, through its subsidiary, owns Petro-Canada Lubricants Inc., whose Mississauga, Ontario facility produces 15,600 barrels per day of base oils and other specialized lubricant products, and also owns a 36% interest (including the 2% general partner interest) in Holly Energy Partners, L.P.

The following is a "safe harbor" statement under the Private Securities Litigation Reform Act of 1995: The statements in this press release relating to matters that are not historical facts are "forward-looking statements" based on management's beliefs and assumptions using currently available information and expectations as of the date hereof, are not guarantees of future performance and involve certain risks and uncertainties, including those contained in our filings with the Securities and Exchange Commission. Although we believe that the expectations reflected in these forward-looking statements are reasonable, we cannot assure you that our expectations will prove correct. Therefore, actual outcomes and results could materially differ from what is expressed, implied or forecast in such statements. Any differences could be caused by a number of factors, including, but not limited to, risks and uncertainties with respect to the actions of actual or potential competitive suppliers of refined petroleum products in the Company's markets, the demand for and supply of crude oil and refined products, the spread between market prices for refined products and market prices for crude oil, the possibility of constraints on the transportation of refined products, the possibility of inefficiencies, curtailments or shutdowns in refinery operations or pipelines, effects of governmental and environmental regulations and policies, the availability and cost of financing to the Company, the effectiveness of the Company's capital investments and marketing strategies, the Company's efficiency in carrying out construction projects, the ability of the Company to acquire refined product operations or pipeline and terminal operations on acceptable terms and to integrate any recent and future acquired operations, the possibility of terrorist attacks and the consequences of any such attacks, general economic conditions and other financial, operational and legal risks and uncertainties detailed from time to time in the Company's Securities and Exchange Commission filings. The forward-looking statements speak only as of the date made and, other than as required by law, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

## **Segment Information**

Our operations are organized into three reportable segments, Refining, PCLI and HEP. Our operations that are not included in the Refining, PCLI and HEP segments are included in Corporate and Other. Intersegment transactions are eliminated in our consolidated financial statements and are included in Consolidations and Eliminations. The Refining segment includes the operations of our El Dorado, Tulsa, Navajo, Cheyenne and Woods Cross refineries and HFC Asphalt (aggregated as a reportable segment). Refining activities involve the purchase and refining of crude oil and wholesale and branded marketing of refined products, such as gasoline, diesel fuel and jet fuel. These petroleum products are primarily marketed in the Mid-Continent, Southwest and Rocky Mountain regions of the United States. Additionally, the Refining segment includes specialty lubricant products produced at our Tulsa refineries that are marketed throughout North America and are distributed in Central and South America. HFC Asphalt operates various asphalt terminals in Arizona, New Mexico and Oklahoma.

On February 1, 2017, we acquired PCLI, a Canadian-based producer of lubricant products such as base oils, white oils, specialty products and finished lubricants. The PCLI segment involves production operations, located in Mississauga, Ontario, and marketing of its products to both retail and wholesale outlets through a global sales network with locations in Canada, the United States, Europe and China.

The HEP segment involves all of the operations of HEP, a consolidated variable interest entity, which owns and operates logistics assets consisting of petroleum product and crude oil pipelines, terminals, tankage, loading rack facilities and refinery process units in the Mid-Continent, Southwest and Rocky Mountain regions of the United States. The HEP segment also includes a 75% interest in the UNEV Pipeline (an HEP consolidated subsidiary), a 50% ownership interest in each of the Frontier Pipeline, Osage Pipeline and the Cheyenne Pipeline and a 25% ownership interest in SLC Pipeline. Revenues from the HEP segment are earned through transactions with unaffiliated parties for pipeline transportation, rental and terminalling operations as well as revenues relating to pipeline transportation services provided for our refining operations. Due to certain basis differences, our reported amounts for the HEP segment may not agree to amounts reported in HEP's periodic public fillings.

## Refining Operating Data

The following tables set forth information, including non-GAAP performance measures about our refinery operations. The cost of products and refinery gross and net operating margins do not include the non-cash effects of lower of cost or market inventory valuation adjustments and depreciation and amortization. Reconciliations to amounts reported under GAAP are provided under "Reconciliations to Amounts Reported Under Generally Accepted Accounting Principles" below.

| Total                               | 100%                       | 100% |  |  |  |  |

- (1) Crude charge represents the barrels per day of crude oil processed at our refineries.
- (2) Refinery throughput represents the barrels per day of crude and other refinery feedstocks input to the crude units and other conversion units at our refineries.
- (3) Refinery production represents the barrels per day of refined products yielded from processing crude and other refinery feedstocks through the crude units and other conversion units at our refineries.
- (4) Includes refined products purchased for resale.
- (5) Represents crude charge divided by total crude capacity (BPSD). Effective July 1, 2016, our consolidated crude capacity increased from 443,000 BPSD to 457,000 BPSD upon completion of our Woods Cross Refinery expansion project.
- (6) Represents average per barrel amount for produced refined products sold, which is a non-GAAP measure.

  Reconciliations to amounts reported under GAAP are provided under "Reconciliations to Amounts Reported Under Generally Accepted Accounting Principles" below.
- (7) Transportation, terminal and refinery storage costs billed from HEP are included in cost of products.
- (8) Excludes lower of cost or market inventory valuation adjustments of \$11.8 million and \$56.1 million for the three months ended March 31, 2017 and 2016, respectively.
- (9) Represents operating expenses of our refineries, exclusive of depreciation and amortization.
- (10) Represents refinery operating expenses, exclusive of depreciation and amortization, divided by refinery throughput.

#### PCLI Operating Data

The following table sets forth information about our PCLI operations for the period from February 1, 2017 (date of acquisition) through March 31, 2017.

| Period From            |
|------------------------|
| February 1, 2017       |
| Through March 31, 2017 |

## **PCLI**

| Throughput (BPD) (1)             | 22,170 |
|----------------------------------|--------|
| Production (BPD) (2)             | 21,760 |
| Sales of produced products (BPD) | 24,140 |

- (1) Throughput represents the barrels per day of feedstocks (principally vacuum gas oil and hydrocracker bottoms) input into our PCLI production facilities.
- (2) Production represents the barrels per day of products yielded from our PCLI production facilities.

#### Reconciliations to Amounts Reported Under Generally Accepted Accounting Principles

Reconciliations of earnings before interest, taxes, depreciation and amortization ("EBITDA") and EBITDA excluding

lower of cost or market inventory valuation adjustments and PCLI acquisition and integration costs, incremental cost of products sold attributable to our PCLI inventory value step-up and net gain on foreign currency swaps ("Adjusted EBITDA") to amounts reported under generally accepted accounting principles ("GAAP") in financial statements.

Earnings before interest, taxes, depreciation and amortization, which we refer to as EBITDA, is calculated as net income (loss) attributable to HollyFrontier stockholders plus (i) interest expense, net of interest income, (ii) income tax provision, and (iii) depreciation and amortization. Adjusted EBITDA is calculated as EBITDA plus or minus (i) lower of cost or market inventory valuation adjustments (ii) PCLI acquisition and integration costs (iii) incremental cost of products sold attributable to our PCLI inventory value step-up and (iv) net gain on foreign currency swaps.

EBITDA and Adjusted EBITDA are not calculations provided for under accounting principles generally accepted in the United States; however, the amounts included in these calculations are derived from amounts included in our consolidated financial statements. EBITDA and Adjusted EBITDA should not be considered as alternatives to net income or operating income as an indication of our operating performance or as an alternative to operating cash flow as a measure of liquidity. EBITDA and Adjusted EBITDA are not necessarily comparable to similarly titled measures of other companies. These are presented here because they are widely used financial indicators used by investors and analysts to measure performance.

EBITDA and Adjusted EBITDA are also used by our management for internal analysis and as a basis for financial covenants.

Set forth below is our calculation of EBITDA and adjusted EBITDA.

|   | Three Months Ended March 31, |                              |        | March 31,                |
|---|------------------------------|------------------------------|--------|--------------------------|

| Add Incremental cost of products sold attributable to PCLI inventory value step-up Less gain on foreign currency swaps Adjusted EBITDA  | \$                           | 10,238<br>(24,545)<br>85,460 | \$     | 96,050                   |
| Adjusted EBITDA attributable to our PCLI segment is calculated as follows: PCLI income from operations (see segment data on page 4) Add depreciation and amortization (see segment data on page 4) PCLI EBITDA Add Incremental cost of products sold attributable to PCLI inventory value | \$                           | 12,394<br>5,074<br>17,468    | •      | ,                        |
| step-up Adjusted PCLI EBITDA  | \$                           | 10,238<br>27,706             |        |                          |

(1) Includes loss on early extinguishment of debt of \$12.2 million and \$8.7 million for the three months ended March 31, 2017 and 2016, respectively.

Reconciliations of refinery operating information (non-GAAP performance measures) to amounts reported under generally accepted accounting principles in financial statements.

Refinery gross margin and net operating margin are non-GAAP performance measures that are used by our management and others to compare our refining performance to that of other companies in our industry. We believe these margin measures are helpful to investors in evaluating our refining performance on a relative and absolute basis. Refinery gross margin per barrel is the difference between average net sales price and average cost of products per barrel of produced

refined products. Net operating margin per barrel is the difference between refinery gross margin and refinery operating expenses per barrel of produced refined products.

These two margins do not include the non-cash effects of lower of cost or market inventory valuation adjustments or depreciation and amortization. Each of these component performance measures can be reconciled directly to our consolidated statements of income. Other companies in our industry may not calculate these performance measures in the same manner.

### Refinery Gross and Net Operating Margins

Below are reconciliations to our consolidated statements of income for (i) net sales, cost of products sold (exclusive of lower of cost or market inventory valuation adjustment) and operating expenses, in each case averaged per produced barrel sold, and (ii) net operating margin and refinery gross margin. Due to rounding of reported numbers, some amounts may not calculate exactly.

## Reconciliation of produced refined product sales to total sales and other revenues

- (1) We purchase finished products to facilitate delivery to certain locations or to meet delivery commitments.
- (2) We purchase crude oil that at times exceeds the supply needs of our refineries. Quantities in excess of our needs are sold at market prices to purchasers of crude oil that are recorded on a gross basis with the sales price recorded as revenues and the corresponding acquisition cost as inventory and then upon sale as cost of products sold. Additionally, at times we enter into buy/sell exchanges of crude oil with certain parties to facilitate the delivery of quantities to certain locations that are netted at cost.
- (3) Other refining segment revenue includes the incremental revenues associated with HFC Asphalt, product purchased and sold forward for profit as market conditions and available storage capacity allows and miscellaneous revenue.
- (4) Other refining segment cost of products sold includes the incremental cost of products for HFC Asphalt, the incremental cost associated with storing product purchased and sold forward as market conditions and available storage capacity allows and miscellaneous costs.
- (5) Other refining segment operating expenses include the marketing costs associated with our refining segment and the operating expenses of HFC Asphalt.
