

## Guidance Software's EnCase(R) eDiscovery Receives Awards from Law Technology News

### EnCase(R) eDiscovery Recognized for Both Collection and Processing

PASADENA, Calif., Dec 16, 2008 (BUSINESS WIRE) --

Guidance Software Inc. (NASDAQ:GUID), the World Leader in Digital Investigations(TM), today announced that EnCase(R) eDiscovery received two bronze awards in the 2008 *Law Technology News* (LTN) Awards for electronic discovery collection and processing. The selection process is based on votes from more than 40,000 LTN subscribers.

"Though there are several technology publications covering our industry, few can match the singular focus on legal technology and circulation of *Law Technology News*," said Victor Limongelli, President & CEO of Guidance Software. "We take great pride in this prestigious distinction and thank the publication's subscribers for holding EnCase eDiscovery in such high esteem."

EnCase eDiscovery is the leading eDiscovery software solution for the search, identification, collection, preservation and processing of electronically stored information (ESI). It performs automated search, collection, and preservation of ESI residing in unstructured and semi-structured data stores such as: desktops, laptops, file servers, email servers, content management systems, and removable storage media, all without any business disruption. Additionally, extensive processing capabilities enable post-collection culling and de-duplication of data, as well as load file creation for the most popular attorney review platforms, allowing customers to drastically reduce processing costs.

"LTN Technology Award winners are nominated and selected by actual product users, who demand solid value and performance," said Stephen Lincoln, Vice President and National Group Publisher for Incisive Media. "These winners can feel proud that their products and services have earned the respect and recognition of professionals throughout the industry."

Guidance Software will be presented with its award at the LTN Technology Awards Dinner at LegalTech New York on February 2, 2009. Information on the awards and winners will be featured in the March 2009 issue of *Law Technology News* and on the magazine's Web site at [www.lawtechnologynews.com](http://www.lawtechnologynews.com).

#### About Guidance Software (GUID)

Guidance Software is recognized worldwide as the industry leader in digital investigative solutions. Its EnCase(R) platform provides the foundation for government, corporate and law enforcement organizations to conduct thorough, network-enabled, and court-validated computer investigations of any kind, such as responding to eDiscovery requests, conducting internal investigations, responding to regulatory inquiries or performing data and compliance auditing - all while maintaining the integrity of the data. There are more than 28,000 licensed users of the EnCase technology worldwide, and thousands attend Guidance Software's renowned training programs annually. Validated by numerous courts, corporate legal departments, government agencies and law enforcement organizations worldwide, EnCase has been honored with industry awards and recognition from *eWEEK*, *SC Magazine*, *Network Computing*, and the *Socha-Gelbmann* survey.
