Guidance Software Announces EnCase® Endpoint Security Version 6

Completely redesigned UX/UI and enhanced detection capabilities raise the bar for EDR solutions

PASADENA, Calif.--(BUSINESS WIRE)-- [Guidance Software](#), the makers of EnCase®, the gold standard in forensic security, today announced [EnCase® Endpoint Security](#) Version 6, a significant redesign of the company's flagship endpoint detection and response (EDR) product.

"Version 6 is a major update for EnCase Endpoint Security. For this release, we improved the entire user experience for our customers," said Michael Harris, chief marketing officer at Guidance. "The result is a product with more powerful detection and scoring of threats, that is also easier to use for both tier-one security analysts and advanced incident responders. EnCase Endpoint Security will reduce the time, complexity, and costs related to threat detection and incident response."

Version 6 combines a completely redesigned interface and user experience (UI/UX), with enhanced threat detection capabilities, and new incident response workflows. The new release also creates more operational efficiencies to improve integrations and ROI on security investments.

EnCase Endpoint Security Version 6 offers customers a host of improvements, including:

Enhanced Endpoint Detection and Response Capabilities

- | EnCase Endpoint Security Version 6 provides conditional detection and embedded threat intelligence with a focus on automation. With this release, customers can more rapidly detect hidden threats before they lead to a breach.
- | Integrated threat intelligence adds a deeper layer of context to security alerts, including numeric threat scores that help IR teams prioritize and respond to critical threats.
- | Version 6 also simplifies additional incident response control actions - including memory scans, IOC searches, and incident investigations - enabling tier-one and tier-two security analysts the ability to quickly get to the heart of any incident.

Improved User Experience

- | EnCase Endpoint Security Version 6 now features a completely redesigned UX/UI designed in standard HTML5 and JavaScript for efficiency, automation, and ease-of-use to reduce manual tasks and improve overall usage.
- | Streamlined security workflows meet the needs of both tier-one security analysts and advanced incident responders.
- | Version 6 is designed to promote greater operational efficiencies by offering meaningful dashboards, process tree visualizations, customizations, shortcuts, and more.

Increased Operational Efficiencies

- | The new EnCase Endpoint Security includes enhanced open APIs that expands the capacity to automate more processes involving third party security tools.
- | Integration with various SIEM tools, like Splunk, allow customers to access EnCase Endpoint Security with a single-pane-of-glass user experience.

EnCase Endpoint Security Version 6 is scheduled for general availability at the end of Q2 2017. For more information, please contact sales@guid.com or visit www.guidancesoftware.com.

About Guidance Software

Guidance (NASDAQ: GUID) exists to turn chaos and the unknown into order and the known - so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic security, Guidance provides a mission-critical

foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats. From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 35 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide, from beginning to endpoint.
