Guidance Software Announces Tableau TX1 Forensic Imager

New device sets the standard for next-generation forensic imaging solutions

PASADENA, Calif.--(BUSINESS WIRE)-- [Guidance Software](#), the makers of EnCase®, the gold standard in forensic security, today announced the release and availability of a new generation of Tableau Forensic Imagers. Model TX1 joins a court-proven product line that includes duplicators, imagers, write-blockers, password recovery solutions, adapters, and accessories that are crucial to digital investigations.

"The TX1 strengthens our position as the leader in forensic imaging," said Ken Basore, senior vice president of engineering at Guidance. "The Tableau TX1 is the fastest and most powerful forensic imager on the market, designed with the specific needs of forensic investigators in mind. The TX1 can image massive quantities of forensic evidence and dramatically increases the speed of forensic investigations by simultaneously running multiple hashing, encryption, and imaging processes."

The tablet-sized screen also features a new design, a color display and intuitive user-interface for improved ease of use.

The TX1 supports more drive connections than any other forensic imager on the market, including SATA, USB 3.0, PCIe, SAS, FireWire 800 & IDE. Network imaging performance is unmatched, offering an industry-first 10GbE connection - well ahead of competing products' 1GbE connection.

The TX1 is available for order immediately and will begin shipping at the end of June. For more information, please contact sales@guid.com or visit www.guidancesoftware.com.

About Guidance Software

Guidance (NASDAQ: GUID) exists to turn chaos and the unknown into order and the known-so that companies and their customers can go about their daily lives as usual without worry or disruption, knowing their most valuable information is safe and secure. The makers of EnCase®, the gold standard in forensic security, and EnForce™, an automated cyber risk management platform, Guidance provides a mission-critical foundation of market-leading applications that offer deep 360-degree visibility across all endpoints, devices and networks, allowing proactive identification and remediation of threats.

Tableau products from Guidance Software meet the critical needs of the digital forensic community worldwide by solving challenges of forensic data acquisition. Tableau forensic duplicators, write-blockers, password recovery solution, adapters, and accessories from Guidance are time-tested and court-proven.

From retail to financial institutions, our field-tested and court-proven solutions are deployed on an estimated 35 million endpoints at more than 70 of the Fortune 100 and hundreds of agencies worldwide, from beginning to endpoint.
