Backflip Studios Hatches DragonVale World on IOS and Android Devices

A stunning new entry in the DragonVale franchise offers fans the ultimate dragon collection experience

BOULDER, Colo., Nov. 3, 2016 /PRNewswire/ -- Today Backflip Studios released DragonVale World, a magical new 3D mobile game inspired by the original chart-topping DragonVale. The game builds on the success of its beloved predecessor, and aims to invite a new wave of players to discover the fun and challenge of creating their own dragon parks. Players collect hundreds of incredibly detailed dragons in a beautiful landscape, meet new characters, unlock new regions, and send their dragons to help collect in-game rewards. The original DragonVale, which recently celebrated its fifth anniversary, is currently played in over 200 countries. It spent a full year on top grossing charts and has been downloaded over 40 million times, making it one of the world's most popular simulation games.

DragonVale World features many of the gameplay elements players love about the original DragonVale, while adding breathtaking 3D graphics, expanded environments, amazingly engaging animations and exciting new social features. Players can collect, feed, breed and show off more than 135 amazing new dragons and even customize those dragons with appearance-changing spells. The addition of compelling new social components lets players around the world trade valuable items like Lava Orbs and Frozen Dew. With many more fantastic features planned for the future, DragonVale World is truly a magical experience.

"Gamers from around the world love the original DragonVale, and many of them have been building their parks and hatching rare dragons for years," said Backflip Studios CEO Julian Farrior. "DragonVale World brings the mechanics of that game into a truly modern mobile gaming platform, offering players bigger and more beautiful dragons than ever before. The artwork, design and 3D graphics in the game are the best in the industry, and we can't wait for players to experience this world."
