

LifeGuard™ - A Technologically Advanced Alternative for Hypalon®

LifeGuard™ outperforms Hypalon®

LifeGuard™
Low Smoke Zero Halogen Cable

Hypalon®

LifeGuard™ cable is made using advanced materials that exhibit superior flame resistance, low smoke production, and reduced toxicity. For years a construction standard throughout the world, low-smoke zero-halogen cable is now being specified in the United States as a suitable alternative to Hypalon® jacketed cables.

HWC's LifeGuard™ cable represents the latest innovation in cable design and technology. It provides significant advantages over traditional constructions of cable and HWC has it in stock and ready for immediate shipment.
