

## InterDigital Signs iWOW to Worldwide 2G and 3G Patent License Agreement

KING OF PRUSSIA, Pa., Jan 08, 2009 (BUSINESS WIRE) --

InterDigital, Inc. (NASDAQ: IDCC) today announced that its patent licensing subsidiaries have signed a non-exclusive, worldwide, royalty-bearing patent license agreement with Singapore-based iWOW Connections Pte Ltd (iWOW). The agreement covers the sale of wireless terminal units and infrastructure, including wireless machine-to-machine (M2M) devices, built to cellular Second Generation (2G and 2.5G) standards and Third Generation (3G) standards and to non-cellular wireless IEEE 802-based standards, through 2015.

iWOW designs, manufactures, and markets an extensive wireless connectivity product line for the machine-to-machine market using GSM, GPRS, and 3G technologies. The company's highly scalable embedded modules and ready-to-use modems address a wide array of applications in the emerging M2M market.

"This new agreement with a M2M company expands InterDigital's licensing coverage and allows us to participate in one of the fastest growing segments of the market," commented Lawrence Shay, President of InterDigital's patent subsidiaries.

### About InterDigital

InterDigital(R) designs, develops and provides advanced wireless technologies and products that drive voice and data communications. InterDigital is a leading contributor to the global wireless standards and holds a strong portfolio of patented technologies which it licenses to manufacturers of 2G, 2.5G, 3G, and 802 products worldwide. Additionally, the company offers a family of SlimChip<sup>(TM)</sup> high performance mobile broadband modem solutions, consisting of Baseband ICs, Modem IP and Reference Platforms. InterDigital's differentiated technology and product solutions deliver time-to-market, performance and cost benefits.
