FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended April 3, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Transition Period From _____ to _____

Commission File Number 1-9929

Insteel Industries, Inc.

(Exact name of registrant as specified in its charter)

North Carolina

(State or other jurisdiction of incorporation or organization)

56-0674867

(I.R.S. Employer Identification No.)

1373 Boggs Drive, Mount Airy, North Carolina

(Address of principal executive offices)

27030

(Zip Code)

Registrant's telephone number, including area code: (336) 786-2141

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes

No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes

No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

The number of shares outstanding of the registrant's common stock as of April 23, 2010 was 17,576,799

INSTEEL INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) Basis of Presentation

The accompanying unaudited interim consolidated financial statements of Insteel Industries, Inc. (“we,” “us,” “our,” “the Company” or “Insteel”) have been prepared pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (“SEC”) for quarterly reports on Form 10-Q. Certain information and note disclosures normally included in the audited financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. These financial statements should therefore be read in conjunction with the consolidated financial statements and notes for the fiscal year ended October 3, 2009 included in the Company’s Annual Report on Form 10-K filed with the SEC.

The accompanying unaudited interim consolidated financial statements reflect all adjustments of a normal recurring nature that the Company considers necessary for a fair presentation of results for these interim periods. The results of operations for the six-month period ended April 3, 2010 are not necessarily indicative of the results that may be expected for the fiscal year ending October 2, 2010 or future periods.

The Company has evaluated subsequent events through the time of filing this Quarterly Report on Form 10-Q and has concluded that there are no significant events that occurred subsequent to the balance sheet date but prior to the filing of this report that would have a material impact on the consolidated financial statements .

(2) Recent Accounting Pronouncements

Current Adoptions

In January 2010, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2010-06, “Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements” (“ASU 2010-06”). This update amends Accounting Standards Codification (“ASC”) Topic 820, Fair Value Measurements and Disclosures, requiring new disclosures on the transfers of assets and liabilities between Level 1 and Level 2 of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, ASU 2010-06 requires a roll forward of activities pertaining to the purchase, sale, issuance and settlement of assets and liabilities measured using significant unobservable inputs (Level 3). This guidance became effective for the Company on January 3, 2010, except for the disclosure on the roll forward activities for Level 3 fair value measurements, which will become effective January 2, 2011. The adoption of ASU 2010-06 did not have an impact on the Company’s consolidated financial statements.

In February 2010, the FASB issued ASU No. 2010-09, “Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements” (“ASU 2010-09”). ASU 2010-09 reiterates that an SEC filer is required to evaluate subsequent events through the date that the financial statements are issued and eliminates the required disclosure of the date through which subsequent events have been evaluated. The updated guidance was effective upon issuance and its adoption did not have an impact on the Company’s consolidated financial statements.

Future Adoptions

In December 2008, the FASB amended certain provisions of ASC Topic 715, Compensation — Retirement Benefits. This amendment requires objective disclosures about postretirement benefit plan assets including investment policies and strategies, categories of plan assets, fair value measurements of plan assets and significant concentrations of risk. This amendment is effective, on a prospective basis, for fiscal years ending after December 15, 2009. The Company is currently evaluating the impact, if any, that the adoption of this amendment will have on its consolidated financial statements.

(3) Fair Value Measurements

In September 2006, the FASB issued new accounting guidance, which establishes a framework for measuring fair value under generally accepted accounting principles (“GAAP”) and expands disclosures about fair value measurements. The Company partially adopted this guidance at the beginning of fiscal 2009 for all instruments recorded at fair value on a recurring basis. In the first quarter of fiscal 2010, the Company adopted the remaining provisions of the guidance for all nonfinancial assets and liabilities that are not remeasured at fair value on a recurring basis. The adoption of these provisions did not have an impact on the Company’s consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Fair value standards define fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, the standards establish a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires that the Company maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets.

Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

As of April 3, 2010, the Company held financial assets that are required to be measured at fair value on a recurring basis. The financial assets held by the Company and the fair value hierarchy used to determine their fair values are as follows:

<i>(In thousands)</i>	<u>Total</u>	<u>Quoted Prices in Active Markets (Level 1)</u>	<u>Observable Inputs (Level 2)</u>
Current assets:			
Cash equivalents	\$51,340	\$ 51,340	\$ —
Other assets:			
Cash surrender value of life insurance policies	4,434	—	4,434
Total	<u>\$55,774</u>	<u>\$ 51,340</u>	<u>\$ 4,434</u>

Cash equivalents, which include all highly liquid investments with original maturities of three months or less, are classified as Level 1 of the fair value hierarchy. The carrying amount of the Company's cash equivalents, which consist of money market funds, approximates fair value due to the short maturities of these investments. Cash surrender value of life insurance policies are classified as Level 2. The fair value of the life insurance policies was determined by the underwriting insurance company's valuation models and represents the guaranteed value the Company would receive upon surrender of these policies as of April 3, 2010.

As of April 3, 2010, the Company held nonfinancial assets that are required to be measured at fair value on a nonrecurring basis. The nonfinancial assets held by the Company and the fair value hierarchy used to determine their fair values are as follows:

<i>(In thousands)</i>	<u>Total</u>	<u>Unobservable Inputs (Level 3)</u>
Other assets:		
Long-lived assets held for sale	<u>\$ 1,880</u>	<u>\$ 1,880</u>

Long-lived assets held for sale includes land and a building associated with the industrial wire business, which the Company exited in June 2006, and are classified as Level 3. The fair value of the long-lived assets was determined based upon an independent third party appraisal obtained in August 2009. The appraised value was established based upon comparable sales of similar assets and certain assumptions regarding market demand for these assets. As this valuation was based upon unobservable inputs, we classified the assets held for sale as Level 3. There was no change in the carrying value of these long-lived assets held for sale during the three- and six-month periods ended April 3, 2010.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

(4) Discontinued Operations

In April 2006, the Company decided to exit the industrial wire business with the closure of its Fredericksburg, Virginia facility, which manufactured tire bead wire and other industrial wire for commercial and industrial applications. The Company's decision was based on the weakening in the business outlook for the facility and the expected continuation of difficult market conditions and reduced operating levels. Manufacturing activities at the Virginia facility ceased in June 2006 and the Company is currently in the process of liquidating the remaining capital assets that were associated with the business.

The results of operations and related non-recurring closure costs associated with the industrial wire business have been reported as discontinued operations for all periods presented. Additionally, the assets and liabilities of the discontinued operations have been segregated in the accompanying consolidated balance sheets.

Assets and liabilities of discontinued operations as of April 3, 2010 and October 3, 2009 are as follows:

<i>(In thousands)</i>	<u>April 3, 2010</u>	<u>October 3, 2009</u>
Assets:		
Other assets	\$ 1,880	\$ 1,880
Total assets	<u>\$ 1,880</u>	<u>\$ 1,880</u>
Liabilities:		
Current liabilities:		
Accounts payable	\$ —	\$ 2
Accrued expenses	222	217
Total current liabilities	222	219
Other liabilities	165	183
Total liabilities	<u>\$ 387</u>	<u>\$ 402</u>

As of April 3, 2010 and October 3, 2009, there was approximately \$1.9 million of capital assets associated with the industrial wire business that were held for sale and approximately \$200,000 and \$217,000, respectively, of accrued expenses and other liabilities related to ongoing lease obligations and closure-related liabilities.

(5) Stock-Based Compensation

Under the Company's equity incentive plans, employees and directors may be granted stock options, restricted stock, restricted stock units and performance awards. As of April 3, 2010 there were 569,000 shares available for future grants under the plans.

Stock option awards . Under the Company's equity incentive plans, employees and directors may be granted options to purchase shares of the Company's common stock at the fair market value on the date of the grant. Options granted under these plans generally vest over three years and expire ten years from the date of the grant. Compensation expense and excess tax benefits associated with stock options for the three- and six-month periods ended April 3, 2010 and March 28, 2009 are as follows:

<i>(In thousands)</i>	<u>Three Months Ended</u>		<u>Six Months Ended</u>	
	<u>April 3, 2010</u>	<u>March 28, 2009</u>	<u>April 3, 2010</u>	<u>March 28, 2009</u>
Stock options:				
Compensation expense	\$268	\$256	\$481	\$465
Excess tax deficiencies (benefits)	8	43	(3)	(2)

As of April 3, 2010, the remaining unamortized compensation cost related to unvested stock option awards was \$933,000, which is expected to be recognized over a weighted average period of 1.46 years.

The fair value of each option grant is estimated on the date of grant using a Monte Carlo valuation model based upon assumptions that are evaluated and revised, as necessary, to reflect market conditions and actual historical experience.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. The dividend yield is calculated based on the Company's annual dividend as of the option grant date. The expected volatility is derived using a term structure based on historical volatility and the volatility implied by exchange-traded options on the Company's common stock. The expected term for options is based on the results of a Monte Carlo simulation model, using the model's estimated fair value as an input to the Black-Scholes-Merton model, and then solving for the expected term.

The estimated fair value of stock options granted during the six-month periods ended April 3, 2010 and March 28, 2009 was \$4.62 and \$4.60, respectively, based on the following assumptions:

	April 3, 2010	March 28, 2009
Risk-free interest rate	2.69%	2.36%
Dividend yield	1.29%	1.51%
Expected volatility	60.68%	79.30%
Expected term (in years)	5.71	4.85

The following table summarizes stock option activity for the six-month period ended April 3, 2010:

	Options Outstanding <i>(in thousands)</i>	Exercise Price Per Share		Contractual Term — Weighted Average	Aggregate Intrinsic Value <i>(in thousands)</i>
		Range	Weighted Average		
Outstanding at October 3, 2009	673	\$0.18 - \$20.27	\$10.83		
Granted	98	9.39 - 9.39	9.39		
Expired	—	— - —	—		
Exercised	(20)	4.19 - 4.19	4.19		\$ 133
Outstanding at April 3, 2010	751	0.18 - 20.27	10.82	7.50 years	1,221
Vested and anticipated to vest in the future at April 3, 2010	739		10.81	7.49 years	1,210
Exercisable at April 3, 2010	415		10.79	6.29 years	896

Restricted stock awards. Under the Company's equity incentive plans, employees and directors may be granted restricted stock awards which are valued based upon the fair market value on the date of the grant. Restricted stock granted under these plans generally vests one to three years from the date of the grant. There were no restricted stock grants during the three- and six-month periods ended April 3, 2010 and March 28, 2009. Amortization expense for restricted stock for the three- and six-month periods ended April 3, 2010 and March 28, 2009 is as follows:

<i>(In thousands)</i>	Three Months Ended		Six Months Ended	
	April 3, 2010	March 28, 2009	April 3, 2010	March 28, 2009
Amortization expense	\$139	\$216	\$269	\$441

As of April 3, 2010, the remaining unrecognized compensation cost related to unvested restricted stock awards was \$341,000, which is expected to be recognized over a weighted average vesting period of 1.08 years.

During the six-month periods ended April 3, 2010 and March 28, 2009, 26,620 and 14,268 shares, respectively, of employee restricted stock awards vested. Upon vesting, employees have the option of remitting payment for the minimum tax obligation to the Company or net-share settling such that the Company will withhold shares with a value equivalent to the respective employee's minimum tax obligation. A total of 5,225 and 1,120 shares, respectively, were withheld during the six-month periods ended April 3, 2010 and March 28, 2009 to satisfy employees' minimum tax obligations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

The following table summarizes restricted stock activity during the six-month period ended April 3, 2010:

<i>(Share amounts in thousands)</i>	Restricted Stock Awards Outstanding	Weighted Average Grant Date Fair Value
Balance, October 3, 2009	115	\$15.50
Granted	—	—
Released	(27)	17.16
Balance, April 3, 2010	<u>88</u>	15.00

Restricted stock units. On January 21, 2009, the Executive Compensation Committee of the Board of Directors approved a change in the equity compensation program such that awards of restricted stock units (“RSUs”) to employees and directors would be made in lieu of awards of restricted stock. RSUs granted under the Company’s equity incentive plans are valued based upon the fair market value on the date of the grant and provide for a dividend equivalent payment during the vesting period, which is generally one to three years from the date of the grant. RSUs do not have voting rights. RSU grants and amortization expense for the three- and six-month periods ended April 3, 2010 and March 28, 2009, respectively, are as follows:

<i>(In thousands)</i>	Three Months Ended		Six Months Ended	
	April 3, 2010	March 28, 2009	April 3, 2010	March 28, 2009
Restricted stock unit grants:				
Units	78	97	78	97
Market value	\$732	\$732	\$732	\$732
Amortization expense	209	79	353	79

As of April 3, 2010, the remaining unrecognized compensation cost related to unvested RSUs was \$1.2 million, which is expected to be recognized over a weighted average vesting period of 1.84 years.

The following table summarizes RSU activity during the six-month period ended April 3, 2010:

<i>(Unit amounts in thousands)</i>	Restricted Stock Units Outstanding	Weighted Average Grant Date Fair Value
Balance, October 3, 2009	136	\$8.71
Granted	78	9.39
Released	(37)	7.55
Balance, April 3, 2010	<u>177</u>	\$9.25

(6) Income Taxes

The Company has recorded the following amounts for deferred income taxes and accrued income taxes on its consolidated balance sheet as of April 3, 2010: a current deferred tax asset (net of valuation allowance) of \$1.7 million in prepaid expenses and other, a non-current deferred tax asset (net of valuation allowance) of \$636,000 in other assets, accrued non-current income taxes payable of \$51,000 in other liabilities, and accrued income taxes payable of \$146,000 in accrued expenses. As of April 3, 2010, the Company has \$27.6 million of gross state operating loss carryforwards (“NOLs”) that begin to expire in 2010, but principally expire in 2018 — 2030.

The realization of the Company’s deferred income tax assets is entirely dependent upon the Company’s ability to generate future taxable income in applicable jurisdictions. GAAP requires that the Company periodically assess the need to establish a valuation allowance against its deferred income tax assets to the extent that it no longer believes it is more likely than not they will be fully utilized. As of April 3, 2010, the Company recorded a valuation allowance of \$559,000 pertaining to various state NOLs that were not expected to be utilized. The valuation allowance established by the Company is subject

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

to periodic review and adjustment based on changes in facts and circumstances and would be reduced should the Company utilize the state NOLs against which an allowance had been provided or determine that such utilization is more likely than not.

As of April 3, 2010, the Company had approximately \$51,000 of gross unrecognized tax benefits classified as other liabilities on its consolidated balance sheet, of which \$48,000, if recognized, would reduce its income tax rate in future periods. As of March 28, 2009, the Company had approximately \$50,000 of gross unrecognized tax benefits classified as other liabilities on its consolidated balance sheet. The Company anticipates the unrecognized tax benefit will not be resolved during the fiscal year.

The Company recognizes interest and penalties related to unrecognized tax benefits as a component of income tax expense. The Company had accrued interest and penalties related to unrecognized tax benefits as of April 3, 2010 and March 28, 2009 of \$18,000 and \$16,000, respectively.

The Company files U.S. federal income tax returns as well as state and local income tax returns in various jurisdictions. Federal and various state tax returns filed by the Company subsequent to tax year 2004 remain subject to examination together with certain state tax returns filed by the Company subsequent to tax year 2002. The Company's 2007 tax year is currently under examination by the U.S. Internal Revenue Service.

(7) Employee Benefit Plans

Retirement plans. The Company has one defined benefit pension plan, the Insteel Wire Products Company Retirement Income Plan for Hourly Employees, Wilmington, Delaware (the "Delaware Plan"). The Delaware Plan provides benefits for eligible employees based primarily upon years of service and compensation levels. The Company's funding policy is to contribute amounts at least equal to those required by law. No contributions were made to the Delaware Plan during the six-month period ended April 3, 2010 and no contributions are expected to be made during the fiscal year ending October 2, 2010. The Delaware Plan was frozen effective September 30, 2008 whereby participants will no longer earn additional service benefits.

Net periodic pension costs and related components for the Delaware Plan for the three- and six-month periods ended April 3, 2010 and March 28, 2009 are as follows:

	Three Months Ended		Six Months Ended	
	April 3, 2010	March 28, 2009	April 3, 2010	March 28, 2009
<i>(In thousands)</i>				
Interest cost	\$ 52	\$ 58	\$ 104	\$ 129
Expected return on plan assets	(50)	(63)	(100)	(132)
Recognized net actuarial loss	49	26	98	61
Net periodic pension cost	<u>\$ 51</u>	<u>\$ 21</u>	<u>\$ 102</u>	<u>\$ 58</u>

Supplemental employee retirement plan . The Company maintains supplemental employee retirement plans (each, a "SERP") with certain of its employees (each, a "Participant"). Under the SERPs, if the Participant remains in continuous service with the Company for a period of at least 30 years, the Company will pay to the Participant a supplemental retirement benefit for the 15-year period following the Participant's retirement equal to 50% of the Participant's highest average annual base salary for five consecutive years in the 10-year period preceding the Participant's retirement. If the Participant retires prior to the later of age 65 or the completion of 30 years of continuous service with the Company, but has completed at least 10 years of continuous service with the Company, the amount of the supplemental retirement benefit will be reduced by 1/360th for each month short of 30 years that the Participant was employed by the Company. Net periodic benefit costs and related components for the SERPs for the three- and six-month periods ended April 3, 2010 and March 28, 2009 are as follows:

Amortization of prior service cost	64	56	128	112
Net periodic benefit cost	\$ 175	\$ 154	\$ 350	\$ 308

(8) Credit Facilities

As of April 3, 2010, the Company had a \$100.0 million revolving credit facility in place, which matures in June 2010 and supplements its operating cash flow in funding its working capital, capital expenditure and general corporate requirements. As of April 3, 2010, no borrowings were outstanding on the revolving credit facility, \$36.6 million of additional borrowing capacity was available and outstanding letters of credit totaled \$1.1 million.

Advances under the credit facility are limited to the lesser of the revolving credit commitment or a borrowing base amount that is calculated based upon a percentage of eligible receivables and inventories plus, upon the Company's request and subject to certain conditions, a percentage of eligible equipment and real estate. Interest rates on the revolver are based upon (1) a base rate that is established at the higher of the prime rate or 0.50% plus the federal funds rate, or (2) at the election of the Company, a LIBOR rate, plus in either case, an applicable interest rate margin. The applicable interest rate margins are adjusted on a quarterly basis based upon the amount of excess availability on the revolver within the range of 0.00% — 0.50% for the base rate and 1.25% — 2.00% for the LIBOR rate. In addition, the applicable interest rate margins would be adjusted to the highest percentage indicated for each range upon the occurrence of certain events of default provided for under the credit facility. Based on the Company's excess availability as of April 3, 2010, the applicable interest rate was 0.00% for the base rate and 1.25% for the LIBOR rate on the revolver.

The Company's ability to borrow available amounts under the revolving credit facility will be restricted or eliminated in the event of certain covenant breaches, events of default or if the Company is unable to make certain representations and warranties provided for in the credit agreement.

Financial Covenants

The terms of the credit facility require the Company to maintain a Fixed Charge Coverage Ratio (as defined in the Credit Agreement) of not less than: (1) 1.10 at the end of each fiscal quarter for the twelve-month period then ended when the amount of excess availability on the revolving credit facility is less than \$10.0 million and the applicable borrowing base only includes eligible receivables and inventories; or (2) 1.15 at the end of each fiscal quarter for the twelve-month period then ended when the amount of excess availability on the revolving credit facility is less than \$10.0 million and the applicable borrowing base includes eligible receivables, inventories, equipment and real estate. As of April 3, 2010, the Company was in compliance with all of the financial covenants under the credit facility.

Negative Covenants

In addition, the terms of the credit facility restrict the Company's ability to, among other things: engage in certain business combinations or divestitures; make investments in or loans to third parties, unless certain conditions are met with respect to such investments or loans; pay cash dividends or repurchase shares of the Company's stock subject to certain minimum borrowing availability requirements; incur or assume indebtedness; issue securities; enter into certain transactions with affiliates of the Company; or permit liens to encumber the Company's property and assets. As of April 3, 2010, the Company was in compliance with all of the negative covenants under the credit facility.

Events of Default

Under the terms of the credit facility, an event of default will occur with respect to the Company upon the occurrence of, among other things: a default or breach by the Company or any of its subsidiaries under any agreement resulting in the acceleration of amounts due in excess of \$500,000 under such agreement; certain payment defaults by the Company or any of its subsidiaries in excess of \$500,000; certain events of bankruptcy or insolvency with respect to the

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

Company; an entry of judgment against the Company or any of its subsidiaries for greater than \$500,000, which amount is not covered by insurance; or a change of control of the Company.

Amortization of capitalized financing costs associated with the senior secured facility was \$125,000 and \$124,000 for the three-month periods ended April 3, 2010 and March 28, 2009, respectively and \$249,000 for the six-month periods ended April 3, 2010 and March 28, 2009. Accumulated amortization of capitalized financing costs was \$3.9 million and \$3.4 million as of April 3, 2010 and March 28, 2009, respectively.

(9) Earnings (Loss) Per Share

Effective October 4, 2009, the Company adopted certain provisions of ASC Topic 260, Earnings Per Share, which requires unvested share-based payment awards that contain non-forfeitable rights to dividends (whether paid or unpaid) to be treated as participating securities and included in the computation of basic earnings per share. The Company's participating securities are its unvested restricted stock awards ("RSAs"). As required under the provisions that were adopted, prior periods have been retrospectively adjusted. Because the Company's unvested RSAs do not contractually participate in its losses, the Company has not allocated such losses to the unvested RSAs in computing basic earnings per share, using the two-class method, for the three- and six-month periods ended March 28, 2009.

The computation of basic and diluted earnings per share attributable to common shareholders for the three- and six-month periods ended April 3, 2010 and March 28, 2009 is as follows:

	Three Months Ended		Six Months Ended	
	April 3, 2010	March 28, 2009	April 3, 2010	March 28, 2009
<i>(In thousands, except per share amounts)</i>

Options and RSUs representing 628,000 shares for the three-month period ended April 3, 2010 were antidilutive and were not included in the diluted EPS calculation. Options, RSAs and RSUs representing 428,000 shares for the three-month period ended March 28, 2009 were antidilutive and were not included in the diluted EPS calculation. Options, RSAs and RSUs representing 496,000 shares and 387,000 shares for the six-month periods ended April 3, 2010 and March 28, 2009, respectively, were antidilutive and were not included in the diluted EPS calculation. Options, RSAs and RSUs representing 140,000 and 144,000 shares for the three- and six-month periods ended March 28, 2009, respectively, were not included in the diluted EPS calculation due to the net losses that were incurred.

(Unaudited)

(10) Share Repurchases

On November 18, 2008, the Company's board of directors approved a new share repurchase authorization to buy back up to \$25.0 million of the Company's outstanding common stock in the open market or in privately negotiated transactions (the "New Authorization"). Repurchases may be made from time to time in the open market or in privately negotiated transactions subject to market conditions, applicable legal requirements and other factors. The Company is not obligated to acquire any particular amount of common stock and the program may be commenced or suspended at any time at the Company's discretion without prior notice. The New Authorization continues in effect until terminated by the Board of Directors. As of April 3, 2010, there was \$24.9 million remaining available for future share repurchases under this authorization. During the three-month period ended April 3, 2010, the Company repurchased \$44,674 or 4,673 shares of its common stock through restricted stock net-share settlements. During the six-month period ended April 3, 2010, the Company repurchased \$51,074 or 5,225 shares of its common stock through restricted stock net-share settlements. During the three- and six-month periods ended March 28, 2009, the Company repurchased \$9,000 or 1,120 shares of its common stock through restricted stock net-share settlements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
(Unaudited)

(12) Business Segment Information

Following the Company's exit from the industrial wire business (see Note 4 to the consolidated financial statements), the Company has one reportable segment which is entirely focused on the manufacture and marketing of concrete reinforcing products for the concrete construction industry. The results of operations for the industrial wire products business have been reported as discontinued operations for all periods presented.

(13) Contingencies

Legal proceedings . On November 19, 2007, Dywidag Systems International, Inc. ("DSI") filed a third-party lawsuit in the Ohio Court of Claims alleging that certain epoxy-coated strand sold by the Company to DSI in 2002, and supplied by DSI to the Ohio Department of Transportation ("ODOT") for a bridge project, was defective. The third-party action seeks recovery of any damages which may be assessed against DSI in the action filed against it by ODOT, which allegedly could be in excess of \$8.3 million, plus \$2.7 million in damages allegedly incurred by DSI. On November 30, 2009, the Ohio court granted the Company's motion to dismiss the third-party claim against it on the grounds that the statute of limitations had expired. The Company anticipates that DSI will attempt to pursue an interlocutory appeal of this ruling, in which case the Company will continue to vigorously defend its position. In addition, the Company had previously filed a lawsuit against DSI in the North Carolina Superior Court in Surry County seeking recovery of \$1.4 million (plus interest) owed for other products sold by the Company to DSI and a judgment declaring that it had no liability to DSI arising out of the bridge project. The North Carolina action was subsequently removed by DSI to the U.S. District Court for the Middle District of North Carolina, where it is currently pending. DSI has filed a motion to dismiss or stay the North Carolina action due to the pendency of the Ohio litigation. This motion, which the Company opposes, is awaiting a ruling by the court. The Company has concluded that a loss is not yet probable with respect to this matter, and therefore no liability has been recorded. In the event that DSI is successful in overturning the dismissal of its claims against the Company (which the Company does not believe is likely), the Company has estimated that the potential loss could range up to \$11.0 million.

The Company is also involved in other lawsuits, claims, investigations and proceedings, including commercial, environmental and employment matters, which arise in the ordinary course of business. The Company does not expect that the ultimate costs to resolve these matters will have a material adverse effect on its financial position, results of operations or cash flows.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Regarding Forward-Looking Statements

This report contains forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, particularly under the caption "Outlook" below. When used in this report, the words "believes," "anticipates," "expects," "estimates," "intends," "may," "should" and similar expressions are intended to identify forward-looking statements. Although we believe that our plans, intentions and expectations reflected in or suggested by such forward-looking statements are reasonable, such forward-looking statements are subject to a number of risks and uncertainties, and we can provide no assurances that such plans, intentions or expectations will be implemented or achieved. All forward-looking statements are based on information that is current as of the date of this report. Many of these risks and uncertainties are discussed in detail, and where appropriate, updated in our periodic and other reports and statements, in particular under the caption "Risk Factors" in our Annual Report on Form 10-K for the year ended October 3, 2009, filed with the U.S. Securities and Exchange Commission. You should carefully review these risks and uncertainties.

All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. All forward-looking statements speak only to the respective dates on which such statements are made and we do not undertake and specifically decline any obligation to publicly release the results of any revisions to these forward-looking statements that may be made to reflect any future events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events, except as may be required by law.

It is not possible to anticipate and list all risks and uncertainties that may affect our future operations or financial performance; however, they would include, but are not limited to, the following:

- general economic and competitive conditions in the markets in which we operate;

Table of Contents

- credit market conditions and the relative availability of financing for us, our customers and the construction industry as a whole;
- the timing and magnitude of the impact of the additional federal infrastructure-related funding provided for under the American Recovery and Reinvestment Act and the anticipated resolution of a new multi-year federal transportation funding authorization;
- the reduced level of spending for nonresidential construction, particularly commercial construction, and the impact on demand for our concrete reinforcing products;
- the severity and duration of the downturn in residential construction activity and the impact on those portions of our business that are correlated with the housing sector;
- the cyclical nature of the steel and building material industries;
- fluctuations in the cost and availability of our primary raw material, hot-rolled steel wire rod, from domestic and foreign suppliers;
- our ability to raise selling prices in order to recover increases in wire rod costs;
- changes in United States (“U.S.”) or foreign trade policy affecting imports or exports of steel wire rod or our products, including the outcome of the trade cases that have been filed by domestic producers of prestressed concrete strand (“PC strand”) regarding imports of PC strand from China;
- unanticipated changes in customer demand, order patterns and inventory levels;
- the impact of weak demand and reduced capacity utilization levels on our unit manufacturing costs;
- our ability to further develop the market for engineered structural mesh (“ESM”) and expand our shipments of ESM;
- the actual net proceeds realized and closure costs incurred in connection with our exit from the industrial wire business;
- legal, environmental, economic or regulatory developments that significantly impact our operating costs;
- unanticipated plant outages, equipment failures or labor difficulties;
- continued escalation in certain of our operating costs; and
- the “Risk Factors” discussed in our Annual Report on Form 10-K for the year ended October 3, 2009 and in other filings that we make with the SEC.

Overview

Insteel Industries, Inc. is one of the nation’s largest manufacturers of steel wire reinforcing products for concrete construction applications. We manufacture and market PC strand and welded wire reinforcement, including ESM, concrete pipe reinforcement and standard welded wire reinforcement. Our products are sold primarily to manufacturers of concrete products that are used in nonresidential construction. We market our products through sales representatives that are our employees and through a sales agent. Our products are sold nationwide as well as into Canada, Mexico, and Central and South America, and delivered primarily by truck, using common or contract carriers. Our business strategy is focused on: (1) achieving leadership positions in our markets; (2) operating as the lowest cost producer; and (3) pursuing growth opportunities within our core businesses that further our penetration of current markets served or expand our geographic reach.

Following our exit from the industrial wire business (see Note 4 to the consolidated financial statements), our operations are entirely focused on the manufacture and marketing of concrete reinforcing products. The results of operations for the industrial wire products business have been reported as discontinued operations for all periods presented.

“N/M” = not meaningful

Second Quarter of Fiscal 2010 Compared to Second Quarter of Fiscal 2009

Net Sales

Net sales for the second quarter of 2010 increased 3.7% to \$52.3 million from \$50.4 million in the same year-ago period. Shipments for the quarter increased 34.7% while average selling prices decreased 23.0% from the prior year levels. The increase in shipments during the current year quarter was primarily driven by customer inventory restocking and hedge buying in anticipation of future price increases, together with the continued favorable effect of the PC strand trade cases against China, which more than offset the negative effect of adverse weather conditions and the reduced level of construction activity. The year-over-year increase in shipments was relative to severely depressed levels in the prior year quarter resulting from the recessionary conditions in the economy and inventory destocking measures that were pursued by our customers. The decrease in average selling prices was due to lower raw material costs and competitive pricing pressures.

Gross Profit (Loss)

Gross profit for the second quarter of 2010 was \$6.2 million, or 11.9% of net sales, compared with a gross loss of \$21.0 million, or (41.7%) of net sales in the same year-ago period. The gross loss in the prior year quarter includes a pre-tax charge of \$16.1 million for inventory write-downs to reduce the value of inventory to the lower of cost or market. Gross profit (loss) for both quarters was unfavorably impacted by depressed shipment volumes, narrower spreads between average selling prices and raw material costs, and elevated unit conversion costs resulting from reduced operating schedules. The year-over-year improvement was primarily due to the absence of inventory write-downs in the current year quarter and, to a lesser extent, higher shipments, wider spreads between average selling prices and raw material costs, and lower unit conversion costs resulting from higher production volumes.

Selling, General and Administrative Expense

Selling, general and administrative expense (“SG&A expense”) for the second quarter of 2010 decreased 4.3% to \$4.2 million, or 8.0% of net sales from \$4.4 million, or 8.7% of net sales in the same year-ago period primarily due to the relative changes in the cash surrender value of insurance policies (\$205,000) together with reductions in bad debt expense (\$96,000). The cash surrender value of life insurance policies increased \$173,000 in the current year quarter compared with a decrease of \$32,000 in the prior year quarter due to the related changes in the value of the underlying investments. The reduction in bad debt expense was due to lower estimates for customer payment defaults. These reductions were partially offset by higher legal expenses primarily associated with the trade cases that have been filed regarding imports of PC strand from China (\$82,000).

Table of Contents

Interest Expense

Interest expense for the second quarter of 2010 decreased \$42,000 or 22.2% to \$147,000 from \$189,000 in the same year-ago period. The decrease was due to borrowings that were outstanding on the revolving credit facility in the prior year.

Income Taxes

Our effective income tax rate for the second quarter of 2010 decreased to 17.8% from 35.8% in the same year-ago period due to changes in the federal tax regulations regarding the carry-back of net operating losses, which increased the tax refund related to the prior year loss by \$500,000, together with changes in permanent book versus tax differences largely related to lower non-deductible life insurance expense.

Earnings (Loss) From Continuing Operations

The earnings from continuing operations for the second quarter of 2010 was \$1.6 million, or \$0.09 per share compared with a loss from continuing operations of \$16.4 million, or (\$0.94) per share in the same year-ago period primarily due to the increase in gross profit and, to a much lesser extent, a decrease in SG&A expense.

Loss From Discontinued Operations

The loss from discontinued operations for the second quarter of 2010 was \$10,000 compared with \$13,000 in the same year-ago period, which had no effect on the net earnings or loss per share for either period. The current and prior year losses resulted from facility-related costs associated with the remaining assets to be sold of the discontinued industrial wire business.

Net Earnings (Loss)

The net earnings for the second quarter of 2010 was \$1.6 million, or \$0.09 per share compared with a net loss of \$16.4 million, or (\$0.94) per share in the same year-ago period primarily due to the increase in gross profit and, to a much lesser extent, decrease in SG&A expense.

First Half of Fiscal 2010 Compared to First Half of Fiscal 2009

Net Sales

Net sales for the first half of 2010 decreased 16.7% to \$93.5 million from \$112.2 million in the same year-ago period. Average selling prices for the period decreased 29.7% while shipments increased 18.5% from the prior year levels. The increase in shipments during the current year period was primarily driven by customer inventory restocking and hedge buying in anticipation of future price increases, together with the continued favorable effect of the PC strand trade cases against China, which more than offset the negative effect of adverse weather conditions and the reduced level of construction activity. The year-over-year increase in shipments was relative to severely depressed levels in the prior year resulting from the recessionary conditions in the economy and inventory destocking measures that were pursued by our customers. The decrease in average selling prices was due to lower raw material costs and competitive pricing pressures.

Gross Profit (Loss)

The gross profit for the first half of 2010 was \$8.0 million, or (8.5%) of net sales, compared with a gross loss of \$25.3 million, or (22.6%) of net sales in the same year-ago period. The first-half gross profit (loss) includes pre-tax charges of \$1.9 million in the current year period and \$23.0 million in the prior year period for inventory write-downs to reduce the carrying value of inventory to the lower of cost or market. Gross profit (loss) for both years was unfavorably impacted by depressed shipment volumes, narrower spreads between average selling prices and raw material costs, and elevated unit conversion costs resulting from reduced operating schedules. The year-over-year improvement was primarily due to lower inventory write-downs in the current year period and, to a lesser extent, higher shipments, wider spreads between average selling prices and raw material costs, and lower unit conversion costs resulting from higher production volumes.

Selling, General and Administrative Expense

SG&A expense for the first half of 2010 decreased 12.9% to \$7.9 million, or 8.5% of net sales from \$9.1 million, or 8.1% of net sales in the same year-ago period. The decrease was primarily due to increases in the cash surrender value of insurance policies (\$1.0 million) together with reductions in employee benefit costs (\$120,000), payroll taxes (\$109,000) and

Table of Contents

labor expense (\$94,000). The cash surrender value of life insurance policies increased \$284,000 in the current year period compared with a decrease of \$757,000 in the prior year period due to the related changes in the value of the underlying investments. The reduction in employee benefit costs is primarily due to a decrease in employee medical expense during the current year period. The reduction in payroll taxes was due to the taxes associated with the payment of the fiscal 2008 employee incentive plan bonuses during the prior year. The reduction in labor expense was primarily due to the implementation of various cost reduction measures. These reductions were partially offset by higher legal expenses primarily associated with the trade cases that have been filed regarding imports of PC strand from China (\$271,000) and increases in stock-based compensation expense (\$143,000).

Interest Expense

Interest expense for the first half of 2010 decreased \$42,000 or 12.5% to \$295,000 from \$337,000 in the same year-ago period. The decrease was primarily due to borrowings that were outstanding on the revolving credit facility in the prior year.

Income Taxes

Our effective income tax rate for the first half of 2010 is distorted due to changes in the federal tax regulations regarding the carry-back of net operating losses, which increased the tax refund related to the prior year loss by \$500,000, together with changes in permanent book versus tax differences largely related to lower non-deductible life insurance expense. The effective income tax rate was 36.5% in the same year-ago period.

Earnings (Loss) From Continuing Operations

Earnings from continuing operations for the first half of 2010 were \$521,000, or \$0.03 per share compared with a loss of \$22.0 million, or (\$1.27) per share in the same year-ago period due to the increase in gross profit and decrease in SG&A expense.

Loss From Discontinued Operations

The loss from discontinued operations for the first half of 2010 was \$23,000 compared with a loss from discontinued operations of \$49,000 in the same year-ago period, which had no effect on the loss per share for either period. The current and prior year period loss resulted from the facility-related costs associated with the remaining assets to be sold of the discontinued industrial wire business.

Net Earnings (Loss)

Net earnings for the first half of 2010 was \$498,000, or \$0.03 per share compared with a net loss of \$22.0 million, or (\$1.27) per share in the same year-ago period primarily due to the increase in gross profit.

Liquidity and Capital Resources

Selected Financial Data
(Dollars in thousands)

Cash Flow Analysis

	Six Months Ended	
	April 3, 2010	March 28, 2009
Net cash provided by (used for) operating activities of continuing operations	\$ 19,480	\$ (16,491)
Net cash used for investing activities of continuing operations	(1,312)	(602)
Net cash used for financing activities of continuing operations	(967)	(9,364)
Net cash used for operating activities of discontinued operations	(40)	(28)
Working capital	84,614	79,095
Total long-term debt	—	400
<i>Percentage of total capital</i>	—	0.3%
Shareholders' equity	\$147,647	\$147,810
<i>Percentage of total capital</i>	100.0%	99.7%
Total capital (total long-term debt + shareholders' equity)	\$147,647	\$148,210

Operating activities provided \$19.5 million of cash during the first half of 2010 while using \$16.5 million during the same period last year. The year-over-year change was primarily due to the improvement in our financial results, the receipt of a \$13.3 million income tax refund in the current year associated with the prior year loss and a decrease in the cash used by the net working capital components of accounts receivable, inventories, and accounts payable and accrued expenses. The current year earnings include a pre-tax charge of \$1.9 million for inventory write-downs compared with a pre-tax charge of \$23.0 million in the prior year period. Other changes in assets and liabilities reflects the receipt of the \$13.3 million income tax refund in the current year that was recorded within prepaid expenses and other, and a \$13.5 million increase in income taxes receivable that was recorded in the prior year period. Net working capital used \$1.0 million in the current year while using \$8.7 million in the same period last year. The cash used by net working capital in the current year was largely due to the \$4.1 million decrease in accounts payable and accrued expenses primarily related to reduced raw material purchases and the \$4.4 million decrease in inventories (excluding the impact of the \$1.9 million of inventory write-downs) resulting from higher current year shipments. Accounts receivable rose \$1.9 million in the current year due to the increase in sales. The cash used by working capital in the prior year period was largely due to the \$28.2 million decrease in accounts payable and accrued expenses resulting from the payment of \$10.9 million of accrued income taxes payable and lower raw material purchases. Inventories increased \$6.8 million in the prior year (excluding the impact of the inventory write-downs) due to raw material receipts on previous purchase commitments. Accounts receivable decreased \$26.2 million during the prior year as a result of the reductions in shipments and selling prices. As the impact and duration of the ongoing weakness in market conditions becomes clearer, we may make additional adjustments in our operating activities, which could materially impact our cash requirements. While an economic slowdown adversely affects sales to our customers, it generally reduces our working capital requirements.

Investing activities used \$1.3 million of cash during the first half of 2010 compared to \$602,000 during the same period last year. The increase in cash used was primarily due to the year-over-year change in the cash surrender value of life insurance policies, which increased by \$410,000 during the current year as compared to a decrease of \$354,000 in the prior year quarter as a result of premium payments and changes in the value of the underlying investments. In addition, \$413,000 of proceeds were received from the surrender of life insurance policies in the prior year. These increases in cash used were partially offset by a \$480,000 reduction in capital expenditures to \$902,000 from \$1.4 million in the prior year. Capital expenditures are expected to total less than \$5.0 million for fiscal 2010. Investing activities are largely discretionary and future outlays could be reduced significantly or eliminated should economic conditions warrant.

Financing activities used \$967,000 of cash during the first half of 2010 compared to \$9.4 million during the same period last year. The year-over-year change was primarily due to the payment of a special cash dividend of \$8.8 million (\$0.50 per share) in addition to the usual quarterly cash dividend and \$400,000 of borrowings on our revolving credit facility during the prior year period.

Credit Facilities

As of April 3, 2010, we had a \$100.0 million revolving credit facility in place to supplement our operating cash flow in funding our working capital, capital expenditure and general corporate requirements. As of April 3, 2010, no borrowings were outstanding on the revolving credit facility, \$36.6 million of additional borrowing capacity was available and outstanding letters of credit totaled \$1.1 million (see Note 8 to the consolidated financial statements).

We believe that, in the absence of significant unanticipated cash demands, cash and cash equivalents, and net cash generated by operating activities will be sufficient to satisfy our expected requirements for working capital, capital expenditures, dividends and share repurchases, if any. We can also access the amounts available under our revolving credit facility, which we expect to either extend or replace prior to the June 2010 maturity date. In the event that we elected not to extend or replace the existing revolving credit facility or if we were unable to do so, we believe that cash and cash equivalents, and net cash generated by operating activities will be sufficient to meet our expected funding requirements. However, further deterioration in general economic conditions could result in additional reductions in demand from our customers, which would likely reduce our operating cash flows. Under such circumstances, we may need to curtail capital and operating expenditures, delay or restrict share repurchases, cease dividend payments and/or realign our working capital requirements.

Should we determine, at any time, that we required additional short-term liquidity, we would evaluate the alternative sources of financing that are potentially available to provide such funding. There can be no assurance that any such financing, if pursued, would be obtained, or if obtained, would be adequate or on terms acceptable to us. However, we believe that our strong balance sheet and capital structure as of April 3, 2010 together with the current borrowing capacity available on our revolving credit facility position us to meet our anticipated liquidity requirements.

Impact of Inflation

We are subject to inflationary risks arising from fluctuations in the market prices for our primary raw material, hot-rolled steel wire rod, and, to a much lesser extent, freight, energy and other consumables that are used in our manufacturing processes. We have generally been able to adjust our selling prices to pass through increases in these costs or offset them through various cost reduction and productivity improvement initiatives. However, our ability to raise our selling prices depends on market conditions and competitive dynamics, and there may be periods during which we are unable to fully recover increases in our costs. During 2009, selling prices for our products declined dramatically in response to softening demand and the inventory destocking measures pursued by our customers, which negatively impacted our financial results as we consumed higher cost inventory that was purchased prior to the collapse in steel prices. Since December 2009, wire rod prices have risen substantially due to the escalation in the cost of scrap and other raw materials for wire rod producers, and could continue to trend higher. The timing and magnitude of any future increases in the prices for wire rod and the impact on selling prices for our products is uncertain at this time.

Off-Balance Sheet Arrangements

We do not have any material transactions, arrangements, obligations (including contingent obligations), or other relationships with unconsolidated entities or other persons, as defined by Item 303(a)(4) of Regulation S-K of the SEC, that have or are reasonably likely to have a material current or future impact on our financial condition, results of operations, liquidity, capital expenditures, capital resources or significant components of revenues or expenses.

Contractual Obligations

There have been no material changes in our contractual obligations and commitments as disclosed in our Annual Report on Form 10-K as of October 3, 2009 other than those which occur in the ordinary course of business.

Critical Accounting Policies

Our financial statements have been prepared in accordance with accounting policies generally accepted in the United States. Our discussion and analysis of our financial condition and results of operations are based on these financial statements. The preparation of our financial statements requires the application of these accounting policies in addition to certain estimates and judgments based on current available information, actuarial estimates, historical results and other assumptions believed to be reasonable. Actual results could differ from these estimates.

Following is a discussion of our most critical accounting policies, which are those that are both important to the depiction of our financial condition and results of operations and that require judgments, assumptions and estimates.

Table of Contents

Revenue recognition. We recognize revenue from product sales when products are shipped and risk of loss and title has passed to the customer. Sales taxes collected from customers are recorded on a net basis and as such, are excluded from revenue.

Concentration of credit risk. Financial instruments that subject us to concentrations of credit risk consist principally of cash and cash equivalents and trade accounts receivable. We are exposed to credit risk in the event of default by institutions in which our cash and cash equivalents are held and by customers to the extent of the amounts recorded on the balance sheet. We invest excess cash primarily in money market funds, which are highly liquid securities that bear minimal risk. Our cash is concentrated primarily at one financial institution, which at times exceeds federally insured limits.

Most of our accounts receivable are due from customers that are located in the U.S. and we generally require no collateral depending upon the creditworthiness of the account. We provide an allowance for doubtful accounts based upon our assessment of the credit risk of specific customers, historical trends and other information. There is no disproportionate concentration of credit risk.

Allowance for doubtful accounts. We maintain allowances for doubtful accounts for estimated losses resulting from the potential inability of our customers to make required payments on outstanding balances owed to us. Significant management judgments and estimates are used in establishing the allowances. These judgments and estimates consider such factors as customers' financial position, cash flows and payment history as well as current and expected business conditions. It is reasonably likely that actual collections will differ from our estimates, which may result in increases or decreases in the allowances. Adjustments to the allowances may also be required if there are significant changes in the financial condition of our customers.

Inventory valuation. We periodically evaluate the carrying value of our inventory. This evaluation includes assessing the adequacy of allowances to cover losses in the normal course of operations, providing for excess and obsolete inventory, and ensuring that inventory is valued at the lower of cost or estimated net realizable value. Our evaluation considers such factors as the cost of inventory, future demand, our historical experience and market conditions. In assessing the realization of inventory values, we are required to make judgments and estimates regarding future market conditions. Because of the subjective nature of these judgments and estimates, it is reasonably likely that actual outcomes will differ from our estimates. Adjustments to these reserves may be required if actual market conditions for our products are substantially different than the assumptions underlying our estimates.

Self insurance. We are self-insured for certain losses relating to medical and workers' compensation claims. Self-insurance claims filed and claims incurred but not reported are accrued based upon management's estimates of the discounted ultimate cost for uninsured claims incurred using actuarial assumptions followed in the insurance industry and historical experience. These estimates are subject to a high degree of variability based upon future inflation rates, litigation trends, changes in benefit levels and claim settlement patterns. Because of uncertainties related to these factors as well as the possibility of changes in the underlying facts and circumstances, future adjustments to these reserves may be required.

Litigation. From time to time, we may be involved in claims, lawsuits and other proceedings. Such matters involve uncertainty as to the eventual outcomes and the potential losses that we may ultimately incur. We record expenses for litigation when it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. We estimate the probability of such losses based on the advice of legal counsel, the outcome of similar litigation, the status of the lawsuits and other factors. Due to the numerous factors that enter into these judgments and assumptions, both the precision and reliability of the resulting estimates are subject to substantial uncertainties. We monitor our potential exposure to these contingencies on a regular basis and may adjust our estimates as additional information becomes known or developments occur.

Assumptions for employee benefit plans. We have two defined employee benefit plans; the Insteel Wire Products Company Retirement Income Plan for Hourly Employees, Wilmington, Delaware (the "Delaware Plan") and the supplemental employee retirement plans (each, a "SERP"). We recognize net periodic pension costs and value pension assets or liabilities based on certain actuarial assumptions, principally the assumed discount rate and the assumed long-term rate of return on plan assets.

The discount rates we utilize for determining net periodic pension costs and the related benefit obligations for our plans are based, in part, on current interest rates earned on long-term bonds that receive one of the two highest ratings assigned by recognized rating agencies. Our discount rate assumptions are adjusted as of each valuation date to reflect current interest rates on such long-term bonds. The discount rates are used to determine the actuarial present value of the benefit obligations as of the valuation date as well as the interest component of the net periodic pension cost for the following year.

Table of Contents

The assumed long-term rate of return on plan assets for the Delaware Plan represents the estimated average rate of return expected to be earned on the funds invested or to be invested in the plan's assets to fund the benefit payments inherent in the projected benefit obligations. Unlike the discount rate, which is adjusted each year based on changes in current long-term interest rates, the assumed long-term rate of return on plan assets will not necessarily change based upon the actual short-term performance of the plan assets in any given year. The amount of net periodic pension cost that is recorded each year is based on the assumed long-term rate of return on plan assets for the plan and the actual fair value of the plan assets as of the beginning of the year. We regularly review our actual asset allocation and, when appropriate, rebalance the investments in the plan to more accurately reflect the targeted allocation.

For 2009, the assumed long-term rate of return utilized for plan assets of the Delaware Plan was 8%. We currently expect to use the same assumed rate for the long-term return on plan assets in 2010. In determining the appropriateness of this assumption, we considered the historical rate of return of the plan assets, the current and projected asset mix, our investment objectives and information provided by our third-party investment advisors.

The projected benefit obligations and net periodic pension cost for the Delaware Plan are based in part on expected increases in future compensation levels. Our assumption for the expected increase in future compensation levels is based upon our average historical experience and management's intentions regarding future compensation increases, which generally approximates average long-term inflation rates.

Assumed discount rates and rates of return on plan assets are reevaluated annually. Changes in these assumptions can result in the recognition of materially different pension costs over different periods and materially different asset and liability amounts in our consolidated financial statements. A reduction in the assumed discount rate generally results in an actuarial loss, as the actuarially-determined present value of estimated future benefit payments will increase. Conversely, an increase in the assumed discount rate generally results in an actuarial gain. In addition, an actual return on plan assets for a given year that is greater than the assumed return on plan assets results in an actuarial gain, while an actual return on plan assets that is less than the assumed return results in an actuarial loss. Other actual outcomes that differ from previous assumptions, such as individuals living longer or shorter lives than assumed in the mortality tables that are also used to determine the actuarially-determined present value of estimated future benefit payments, changes in such mortality tables themselves or plan amendments will also result in actuarial losses or gains. Under Generally Accepted Accounting Principles ("GAAP"), actuarial gains and losses are deferred and amortized into income over future periods based upon the expected average remaining service life of the active plan participants (for plans for which benefits are still being earned by active employees) or the average remaining life expectancy of the inactive participants (for plans for which benefits are not still being earned by active employees). However, any actuarial gains generated in future periods reduce the negative amortization effect of any cumulative unamortized actuarial losses, while any actuarial losses generated in future periods reduce the favorable amortization effect of any cumulative unamortized actuarial gains.

The amounts recognized as net periodic pension cost and as pension assets or liabilities are based upon the actuarial assumptions discussed above. We believe that all of the actuarial assumptions used for determining the net periodic pension costs and pension assets or liabilities related to the Delaware Plan are reasonable and appropriate. The funding requirements for the Delaware Plan are based upon applicable regulations, and will generally differ from the amount of pension cost recognized for financial reporting purposes. No contributions were required to be made to the Delaware Plan in the prior year.

We currently expect net periodic pension costs for both plans to total \$906,000 during 2010. However, we do not expect any cash contributions to the Delaware Plan will be required during 2010. Contributions to the SERPs are expected to total \$155,000 during 2010, matching the required benefit payments.

Recent Accounting Pronouncements

Current Adoptions

In January 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements" ("ASU 2010-06"). This update amends Accounting Standards Codification ("ASC") Topic 820, Fair Value Measurements and Disclosures, requiring new disclosures on the transfers of assets and liabilities between Level 1 and Level 2 of the fair value measurement hierarchy, including the reasons and the timing of the transfers. Additionally, ASU 2010-06 requires a roll forward of activities pertaining to the purchase, sale, issuance and settlement of assets and liabilities measured using significant unobservable inputs (Level 3). This guidance became effective for us on January 3, 2010, except for the

Table of Contents

disclosure on the roll forward activities for Level 3 fair value measurements, which will become effective January 2, 2011. The adoption of ASU 2010-06 did not have an impact on our consolidated financial statements.

In February 2010, the FASB issued ASU No. 2010-09, “Subsequent Events (Topic 855): Amendments to Certain Recognition and Disclosure Requirements” (“ASU 2010-09”). ASU 2010-09 reiterates that an SEC filer is required to evaluate subsequent events through the date that the financial statements are issued and eliminates the required disclosure of the date through which subsequent events have been evaluated. The updated guidance was effective upon issuance and did not have an impact on our consolidated financial statements.

Future Adoptions

In December 2008, the FASB amended certain provisions of ASC Topic 715, Compensation — Retirement Benefits. This amendment requires objective disclosures about postretirement benefit plan assets including investment policies and strategies, categories of plan assets, fair value measurements of plan assets and significant concentrations of risk. This amendment is effective, on a prospective basis, for fiscal years ending after December 15, 2009. We are currently evaluating the impact, if any, that the adoption of this amendment will have on our consolidated financial statements.

Outlook

Our visibility for business conditions through the remainder of 2010 is clouded by the continued uncertainty regarding future global economic conditions and the impact of the measures that have been undertaken by the federal government to ease the tightening in the credit markets and stimulate the economy. We expect the ongoing weakness in nonresidential construction, our primary demand driver, to continue, particularly for commercial projects which have been the most severely impacted by the economic downturn. There continues to be uncertainty regarding the resolution of a new multi-year federal highway funding authorization. Although the additional infrastructure-related funding provided for under the American Recovery and Reinvestment Act is expected to increase during the remainder of 2010, any favorable impact is likely to be mitigated by continued deterioration in the fiscal positions of state and local governments. We anticipate that residential construction will remain weak, which would continue to adversely affect shipments to customers that have greater exposure to the housing sector.

Following an extended decline that began in September 2008, prices for our primary raw material, hot-rolled steel wire rod, appear to have bottomed out and have risen substantially since December 2009 due to the escalation in the cost of scrap and other raw materials for wire rod producers and the reductions in domestic wire rod capacity that occurred during 2009. The timing and magnitude of any future increases and the impact on selling prices for our products is uncertain at this time.

In response to the challenges facing us, we will continue to focus on the operational fundamentals of our business: closely managing and controlling our expenses; aligning our production schedules with demand in a proactive manner as there are changes in market conditions to minimize our cash operating costs; and pursuing further improvements in the productivity and effectiveness of all of our manufacturing, selling and administrative activities. We also expect gradually increasing contributions from the substantial investments we have made in our facilities in recent years in the form of reduced operating costs and additional capacity to support future growth when market conditions improve (see “Cautionary Note Regarding Forward-Looking Statements” and “Risk Factors”). In addition to these organic growth and cost reduction initiatives, we are continually evaluating strategic acquisition opportunities that further our penetration in current markets served or expand our geographic reach.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our cash flows and earnings are subject to fluctuations resulting from changes in commodity prices, interest rates and foreign exchange rates. We manage our exposure to these market risks through internally established policies and procedures and, when deemed appropriate, through the use of derivative financial instruments. We do not use financial instruments for trading purposes and we are not a party to any leveraged derivatives. We monitor our underlying market risk exposures on an ongoing basis and believe that we can modify or adapt our hedging strategies as necessary.

Commodity Prices

We are subject to significant fluctuations in the cost and availability of our primary raw material, hot-rolled steel wire rod, which we purchase from both domestic and foreign suppliers. We negotiate quantities and pricing for both domestic and foreign steel wire rod purchases for varying periods (most recently monthly for domestic suppliers), depending upon market conditions, to manage our exposure to price fluctuations and to ensure adequate availability of material consistent

Table of Contents

with our requirements. We do not use derivative commodity instruments to hedge our exposure to changes in prices as such instruments are not currently available for steel wire rod. Our ability to acquire steel wire rod from foreign sources on favorable terms is impacted by fluctuations in foreign currency exchange rates, foreign taxes, duties, tariffs and other trade actions. Although changes in wire rod costs and our selling prices may be correlated over extended periods of time, depending upon market conditions and competitive dynamics, there may be periods during which we are unable to fully recover increased wire rod costs through higher selling prices, which would reduce our gross profit and cash flow from operations. Additionally, should wire rod costs decline, our financial results may be negatively impacted if the selling prices for our products decrease to an even greater degree and to the extent that we are consuming higher cost material from inventory. Based on our shipments and average wire rod cost reflected in cost of sales for the first six months of 2010, a 10% increase in the price of steel wire rod would have resulted in a \$5.9 million decrease in our pre-tax earnings for the six months ended April 3, 2010 (assuming there was not a corresponding change in our selling prices).

Interest Rates

Although we were debt-free as of April 3, 2010, future borrowings under our senior secured credit facility are sensitive to changes in interest rates.

Foreign Exchange Exposure

We have not typically hedged foreign currency exposures related to transactions denominated in currencies other than U.S. dollars, as such transactions have not been material in the past. We will occasionally hedge firm commitments for certain equipment purchases that are denominated in foreign currencies. The decision to hedge any such transactions is made by us on a case-by-case basis. There were no forward contracts outstanding as of April 3, 2010.

Item 4. Controls and Procedures

We have conducted an evaluation of the effectiveness of our disclosure controls and procedures as of April 3, 2010. This evaluation was conducted under the supervision and with the participation of management, including our principal executive officer and our principal financial officer. Based upon that evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms. Further, we concluded that our disclosure controls and procedures were effective to ensure that information is accumulated and communicated to management, including our principal executive officer and our principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

There has been no change in our internal control over financial reporting that occurred during the quarter ended April 3, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings

On November 19, 2007, Dywidag Systems International, Inc. ("DSI") filed a third-party lawsuit in the Ohio Court of Claims alleging that certain epoxy-coated strand sold by us to DSI in 2002, and supplied by DSI to the Ohio Department of Transportation ("ODOT") for a bridge project, was defective. The third-party action seeks recovery of any damages which may be assessed against DSI in the action filed against it by ODOT, which allegedly could be in excess of \$8.3 million, plus \$2.7 million in damages allegedly incurred by DSI. On November 30, 2009, the Ohio court granted our motion to dismiss the third-party claim against it on the grounds that the statute of limitations had expired. We anticipate that DSI will attempt to pursue an interlocutory appeal of this ruling, in which case we will continue to vigorously defend our position. In addition, we had previously filed a lawsuit against DSI in the North Carolina Superior Court in Surry County seeking recovery of \$1.4 million (plus interest) owed for other products sold by us to DSI and a judgment declaring that it had no liability to DSI arising out of the bridge project. The North Carolina action was subsequently removed by DSI to the U.S. District Court for the Middle District of North Carolina, where it is currently pending. DSI has filed a motion to dismiss or stay the North Carolina action due to the pendency of the Ohio litigation. This motion, which we oppose, is awaiting a ruling by the court. We have concluded that a loss is not yet probable with respect to this matter, and therefore no liability has been recorded. In the event that DSI is successful in overturning the dismissal of its claims against us (which we do not believe is likely), we have estimated that the potential loss could range up to \$11.0 million.

Table of Contents

On May 27, 2009, a coalition of domestic PC strand producers, including us, filed antidumping (“AD”) and countervailing duty (“CVD”) petitions alleging that imports of PC strand from China had caused material injury to the domestic industry. The petitions allege that imports of PC strand from China were being “dumped” or sold in the U.S. at a price that was lower than its fair value and that subsidies were being provided to Chinese PC strand producers by the Chinese government. In connection with its investigative process, the U.S. Department of Commerce (“DOC”) has issued preliminary determinations in favor of the petitioners, imposing preliminary CVD margins ranging from 7.53% to 12.06% on October 26, 2009 and preliminary AD margins ranging from 37.72% to 193.55% on December 18, 2009. Subsequent to these dates, importers of Chinese PC strand are required to post cash deposits or bonds in the amount of the preliminary margins calculated by the DOC. The entire investigative process is anticipated to take one year, with the final determinations of injury, dumping and subsidies expected to occur in mid-2010.

We are also involved in other lawsuits, claims, investigations and proceedings, including commercial, environmental and employment matters, which arise in the ordinary course of business. We do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our financial position, results of operations or cash flows.

Item 1A. Risk Factors

There were no material changes during the quarter ended April 3, 2010 from the risk factors set forth under Part I, Item 1A., “Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended October 3, 2009. You should carefully consider these factors in addition to the other information set forth in this report which could materially affect our business, financial condition or future results. The risks and uncertainties described in this report and in our Annual Report on Form 10-K for the year ended October 3, 2009, as well as other reports and statements that we file with the SEC, are not the only risks and uncertainties facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial may also have a material adverse effect on our financial position, results of operations or cash flows.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On November 18, 2008, our Board of Directors approved a new share repurchase authorization to buy back up to \$25.0 million of our outstanding common stock in the open market or in privately negotiated transactions (the “New Authorization”). The New Authorization replaces the previous authorization to repurchase up to \$25.0 million of our common stock, which was scheduled to expire on December 5, 2008. Repurchases may be made from time to time in the open market or in privately negotiated transactions subject to market conditions, applicable legal requirements and other factors. We are not obligated to acquire any particular amount of common stock and the program may be commenced or suspended at any time at our discretion without prior notice. The New Authorization continues in effect until terminated by the Board of Directors. As of April 3, 2010, there was \$24.9 million remaining available for future share repurchases under this authorization. During the three-month period ended April 3, 2010, we repurchased \$44,674 or 4,673 shares of our common stock through restricted stock net-share settlements. During the six-month period ended April 3, 2010, we repurchased \$51,074 or 5,225 shares of our common stock through restricted stock net-share settlements. During the three- and six-month periods ended March 28, 2009, we repurchased \$9,000 or 1,120 shares of our common stock through restricted stock net-share settlements.

The following table summarizes our repurchases of common stock during the quarter ended April 3, 2010:

<i>(In thousands except per share amounts)</i>	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Maximum Number (or Approximate Dollar Value) of Shares That May Yet Be Purchased Under the Plan or Program
January 3, 2010 - February 6, 2010	—	—	—	\$24,970(1)
February 7, 2010 - March 6, 2010 (2)	4,673	\$9.56	4,673	24,925(1)
March 7, 2010 - April 3, 2010	—	—	—	24,925(1)
Total	<u>4,673</u>		<u>4,673</u>	24,925(1)

- (1) Under the \$25.0 million share repurchase authorization announced on November 18, 2008, which continues in effect until terminated by the Board of Directors.
- (2) Represents 4,673 shares surrendered by employees to satisfy tax withholding obligations upon the vesting of restricted stock awards.

Item 5. Other Information

On February 9, 2010, we held our 2010 Annual Meeting of Shareholders. The following matters were submitted to a vote of our shareholders of record at the Annual Meeting and approved by the requisite vote of our shareholders represented in person or by proxy as follows:

Proposal 1 : Election of each of the persons named below to serve a three-year term expiring at the 2013 Annual Meeting of Shareholders or until their successors are elected and qualify.

Nominee	Number of Shares		
	For	Withheld	Broker Non-Votes
Louis E. Hannen	8,269,537	6,200,057	1,404,811
Howard O. Woltz, Jr.	8,268,427	6,201,167	1,404,811
C. Richard Vaughn	8,258,827	6,210,767	1,404,811

Proposal 2 : Amendment of our Restated Charter to increase the number of shares of common stock we are authorized to issue to 50,000,000.

Number of Shares		
For	Against	Abstain
10,902,754	4,939,305	32,341

Proposal 3 : Ratification of the appointment of Grant Thornton LLP as our independent registered public accounting firm for the fiscal year ending October 2, 2010.

Number of Shares		
For	Against	Abstain
15,556,880	303,284	14,242

Item 6. Exhibits

- 3.1 Articles of Amendment to Restated Articles of Incorporation of Insteel Industries, Inc.

State of North Carolina
Department of the Secretary of State
ARTICLES OF AMENDMENT
BUSINESS CORPORATION

Pursuant to §55-10-06 of the General Statutes of North Carolina, the undersigned corporation hereby submits the following Articles of Amendment for the purpose of amending its Articles of Incorporation.

1. The name of the corporation is: Insteel Industries, Inc.
2. The text of the amendment adopted is as follows (*State below or attach*):

The Articles of Incorporation are amended by deleting the first sentence of Article IV thereof and substituting that sentence with the following sentence:

“The corporation shall have authority to issue Fifty-One Million (51,000,000) shares of stock, consisting of: Fifty Million (50,000,000) shares of a class designated “Common Stock (No Par Value)””; and One Million (1,000,000) shares of a class designated “No Par Preferred Stock”, having no par value.”

3. The date of adoption of the amendment was February 9, 2010.
4. (Check either a, b, c, or d, whichever is applicable)
 - a. ___ The amendment(s) was (were) duly adopted by the incorporators prior to the issuance of shares.
 - b. ___ The amendment(s) was (were) duly adopted by the board of directors prior to the issuance of shares.
 - c. ___ The amendment(s) was (were) duly adopted by the board of directors without shareholder action as shareholder action was not required because (*set forth a brief explanation of why shareholder action was not required.*)
 - d. X The amendment was approved by shareholder action, and such shareholder approval was obtained as required by Chapter 55 of the North Carolina General Statutes.
5. These articles will be effective upon filing.

This the 9th day of February, 2010.

INSTEEL INDUSTRIES, INC.

NOTES:

1. Filing fee is \$50. This document must be filed with the Secretary of State.

CERTIFICATION

I, H.O. Woltz III, certify that:

1. I have reviewed this Quarterly Report on Form 10-Q for the quarter ended April 3, 2010 of Insteel Industries, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
