About Insmmed

Insmmed Incorporated is a global biopharmaceutical company focused on the unmet needs of patients with rare diseases. The company is advancing a global phase 3 clinical study of ARIKAYCE (liposomal amikacin for inhalation) in nontuberculous mycobacteria (NTM) lung disease, a rare and often chronic infection that is capable of causing irreversible lung damage and can be fatal. There are currently no products indicated for the treatment of NTM lung disease in the United States or European Union (EU). Insmmed's earlier-stage clinical pipeline includes INS1007, a novel oral inhibitor of dipeptidyl peptidase I with therapeutic potential in non-cystic fibrosis bronchiectasis, and INS1009, an inhaled prodrug formulation of treprostinil that may offer a differentiated product profile for rare pulmonary disorders. For more information, visit www.insmed.com.

"Insmmed" and "ARIKAYCE" are the company's trademarks. All other trademarks, trade names or service marks appearing in this press release are the property of their respective owners.
