Notes:

(1) Segment profit is defined as segment revenues less direct cost of network, sales and services, exclusive of depreciation and amortization for the segment, as presented in the notes to our financial statements filed with the United States Securities and Exchange Commission in Quarterly Reports on Form 10-Q and Annual Reports on Form 10-K. Segment profit does not include direct costs of customer support, direct costs of amortization of acquired technologies or any other depreciation or amortization associated with direct costs.

(2) Segment margin is defined as segment profit as a percentage of segment revenues.

(3) Adjusted operating expense is defined as operating expense defined by accounting principles generally accepted in the United States of America, or GAAP, less direct cost of network and sales, depreciation and amortization, impairments and restructuring and stock-based compensation expense.

(4) Adjusted EBITDA is defined as income (loss) from operations plus stock-based compensation, depreciation and amortization, (loss) gain on disposal of property and equipment, and impairments and restructuring.

(5) Adjusted EBITDA margin is defined as adjusted EBITDA as a percentage of revenues.

(6) Normalized net income (loss) is defined as net income (loss) plus stock-based compensation and impairments and restructuring.

(7) Normalized net income (loss) per share is defined as normalized net income (loss) divided by basic and normalized diluted shares.

(8) Net (loss) income and normalized net income (loss) available to common stockholders excludes amounts allocated to unvested restricted stock awards, which, by definition, are participating securities. However, participating securities do not share in any net loss or normalized net loss.

(9) Normalized diluted shares is defined as diluted common shares outstanding used in GAAP net income (loss) per share calculation, excluding the effect of stock-based compensation under the treasury stock method.
