

Oscar-awarding Winning Visual Effect Studio Signs with INAP for Customized Private Cloud Rendering and Network Private Extension

Global company chooses INAP for their ability to deliver a powerful render farm in the company's Montreal Datacenter by providing a high-end network backbone and critical facility needs

ATLANTA, June 28, 2017 /PRNewswire/ -- Internap Corporation (NASDAQ: INAP), a provider of high-performance data center services including Colocation, Network and Managed Services, and Cloud Services, today announced an agreement for private cloud services at the company's Montreal data center for a global award-winning visual effects company that creates extraordinary images and scenes for some of Hollywood's biggest pictures.

In making its selection through a rigorous competitive process, INAP's Montreal location was chosen given its superiority in redundancy in power, network, and availability to meet the mission critical added infrastructure. Hollywood continues to use the cloud for animation and unbelievable visual effects and INAP is the perfect fit for these types of companies. For rendering jobs that require hundreds of servers with short notice, INAP continues to deliver performance, agility and cost competitiveness.

"We are committed to providing superior performance and service for Visual Effects Studios by demonstrating our agility in providing great amounts of Cloud infrastructure and network quality to deliver to their volume and scale requirements on short notice," said Andrew Day, INAP Cloud's SVP & General Manager.

About Internap Corporation

Internap Corporation (NASDAQ: INAP) is a leading technology provider of data center services through both Colocation Business and Enterprise Services (including network connectivity, IP, bandwidth, and Managed Hosting), and Cloud Services (including enterprise-grade AgileCLOUD 2.0, Bare-Metal Servers, and SMB iWeb platforms). INAP's global high-capacity network connects 15 company-controlled Tier 3-type data centers in major markets in North America, 34 wholesale partnered facilities, and points of presence in 26 central business districts around the world. INAP continues to transform since its inception in 1996, meeting customer demand for custom solutions and high-touch state-of-the-art colocation and cloud products and services. INAP now operates a premium business model that also provides high-power density colocation, low-latency bandwidth, and public and private cloud platforms in an expanding internet infrastructure industry.
