

SAT Corporation to Provide a Signal Monitoring and Interference Detection System to APT Satellite Company Limited

Monics® First Satellite Monitoring System in Industry to Support 8QAM and 64QAM Modulation

Sunnyvale, CA, August 3, 2009 - Integral Systems, Inc., (NASDAQ: ISYS) announced today that its wholly-owned subsidiary, SAT Corporation has been chosen by APT Satellite Company Limited (APT), a wholly-owned subsidiary of APT Satellite Holdings Limited (APT Group) to provide the Monics® satellite monitoring and interference detection system.

Monics is a state-of-the-art system that automatically monitors the APT carriers and utilizes SAT Corporation's Digital Signal Processing (DSP) technology. Monics' technology will detect interference and unauthorized user's of APT's system payloads much faster than a classic spectrum analyzer. The system uses unique algorithms to automatically detect, characterize, and display interfering signals, and allows results to be viewed at any time. With its ability to detect CW, BPSK, QPSK, OQPSK, 8PSK, 8APSK, 16QAM, 32APSK, and now 8QAM and 64QAM modulation types, Monics is the first worldwide system able to provide these services.

"APT like other commercial operators are increasingly turning to SAT Corp for solutions that can help them meet their carrier monitoring requirements," said Bob Potter, president of SAT Corporation. "Built on our deep technical expertise and supported by a customer-centric development focus, we are able to produce solutions that support the unique needs of commercial operators and have a meaningful impact on their operational efficiency as well."

ABOUT INTEGRAL SYSTEMS

Integral Systems, Inc., of Columbia, MD, applies more than 25 years experience to provide integrated technology solutions for SATCOM-interfaced networks. Customers have relied on the Integral Systems family of companies (Integral Systems, Inc., Integral Systems Europe, Lumistar, Inc., Newpoint Technologies, Inc., RT Logic, and SAT Corporation) to deliver on time and on budget for more than 250 satellite missions. Our dedication to customer service has solidified long-term relationships with the U.S. Air Force, NASA, NOAA, and nearly every satellite operator in the world. Integral Systems is listed in Forbes' Top 200 Small Companies in America for 2008. For more information, visit www.integ.com.

About APT (www.apstar.com)

APT SATELLITE HOLDINGS LIMITED (the "Group") is listed on the stock exchange in Hong Kong. The Group, through its wholly-owned subsidiary, APT Satellite Company Limited, provides high-quality services in satellite transponders, satellite communications and broadcasting services for the broadcasting and telecommunications sectors in Asia Pacific, Europe and the United States. The Group currently operates the APSTAR systems, including Apstar 5, Apstar 6, and Apstar 2R, through its own Satellite Control Center in Tai Po, Hong Kong. In line with its business development strategies, the Group also provides satellite broadcasting services and telecommunications services to customers. (Stock code: 1045)
