

eVoice Launches Free Android Application for Mobile Businesses

New Android mobile phone application helps mobile workers maintain a professional image while away from the office

LOS ANGELES, June 15, 2010 /PRNewswire via COMTEX News Network/ -- eVoice(R) announced today the availability of its new Android(R) mobile phone application as a free download. The Android application makes it easy for eVoice subscribers to manage business on the go - answering and routing calls professionally, converting voice mails to text, and reinforcing the business-centric image mobile workers need when away from the office. eVoice, is a brand of technology leader [j2 Global Communications, Inc.](http://www.j2global.com) (NasdaqGS: JCOM) and is currently available online as a six-month free trial at <http://www.evoice.com>.

The eVoice service makes it possible for mobile professionals to route incoming business calls to multiple phone numbers, including cell, home office, home phone, etc. eVoice helps solve a dilemma faced by many mobile professionals: "How can I maintain my professional image and availability to my clients and customers when I'm away from the office?"

The Android Application integrates key features currently found in eVoice's web-based application, including:

- **Click to Call/Caller ID:** This feature allows eVoice subscribers to maintain a professional image when making business-related calls from the Android by allowing the user to return calls directly from within the message, while displaying the user's eVoice number as the outgoing Caller ID.
- **Message Search:** Saves time by eliminating lengthy voicemail searches. Messages that have been converted to text can easily be retrieved using keyword search.
- **Enhanced Dialing:** Speed dial allows important business contacts to be reached with one touch directly from within the app, displaying the eVoice phone number as the outgoing Caller ID.

eVoice offers a choice of three plans, starting as low as \$12.95/mo and including: choice of toll-free or local number; auto attendant; call routing (forwarding, transfer, screening); enhanced voicemail; voicemail-to-text; customized professional greeting; conference calling; online account administration and call history; custom hold music; and more.

"Google's Android mobile operating system has continued to gain momentum since its introduction, and smart phones are increasingly becoming a central component of a business professional's communications toolset," said Mark Meyers, director, voice services for j2 Global Communications, Inc. "With features such as Click to Call and Enhanced Dialing, the new Android Application makes it easier for eVoice subscribers to project a professional image when doing business from a mobile phone."

eVoice is a registered trademark of j2 Global Communications, Inc.
