Our intra-quarter trends as well as the momentum we have carried into the beginning of the first quarter are providing encouraging signs about our ability to continue accelerating revenue growth in 2017. We are confident in the structure and strength of our organization and believe that the actions taken during 2016 position us well to maximize our market opportunities. Our bias continues to be to invest in our business to generate long-term shareholder value. These investments include measured and balanced additions to our revenue-generating talent and enhancing and sustaining sales and delivery training and tools. We also plan to continue our technology-related investments while taking appropriate care to monitor opportunities that technological advancements might provide us to enhance our operating model. We continue to see clients seek flexible resources as they invest in technology to more effectively meet the needs of their customers.

We are very pleased to welcome Randall Mehl to the Kforce Board of Directors. Mr. Mehl has served as a lead investor and director for other companies in the areas of digital marketing, IT services, analytics, and workforce management as well as having prior experience as a sell-side equity analyst in business services. I also want to thank all of our employees and consultants for your continued hard work and dedication, particularly throughout 2016 where we experienced many organizational changes, as well as express our continued gratitude to our clients for allowing us the privilege of serving vou."

Joseph J. Liberatore, President said, "We are pleased to have returned to year-over-year revenue growth on a billing day basis in Tech Flex and FA Flex. The improvements we experienced during the fourth quarter in both of these businesses is also translating into a solid start to our first quarter of 2017.

We have been focused throughout 2016 on positioning our sales and delivery teams to operate with greater consistency and discipline to improve the intimacy with our clients, candidates and consultants. This included rebalancing our revenue-generating talent between sales and delivery, which has allowed us to reaccelerate our client facing activities and diversify our client portfolio over a broader range of our largest clients. We believe these efforts and our intense focus on our ongoing sales transformation initiative have laid a solid foundation for continued acceleration of revenue growth."

Mr. Liberatore noted additional operational results for the fourth quarter include:

- Flex revenues of \$314.7 million in Q4 '16 increased 2.1%, on a billing day basis, from \$323.5 million in Q3 '16 and increased 1.8%, on a billing day basis, from \$314.3 million in Q4 '15.

Kelly, Chief Financial Officer, said, "We remain confident that we will meet or exceed our 7.5% operating margin target when \$1.6 billion in annualized revenue is reached and still expect to achieve an operating margin of at least 6.3% at \$1.4 billion in annualized revenue, which we may see as early as the second quarter of 2017. We returned a significant amount of capital to our shareholders in the form of dividends and open market share repurchases, which amounted to approximately \$56 million in 2016, and is further confirmation of our belief in the strength of our business. We are also

pleased to announce that our Board of Directors declared a first quarter cash dividend on Kforce common stock of \$0.12 per share. The cash dividend will be payable on March 24, 2017 to shareholders of record as of the close of business on March 10, 2017."

## Kforce Inc. Non-GAAP Financial Measures (In Thousands, Except Per Share Amounts) (Unaudited)

The following non-GAAP financial measures presented may not provide information that is directly comparable to that provided by other companies, as other companies may calculate such financial results differently. The Company's non-GAAP financial measures are not measurements of financial performance under GAAP and should not be considered as alternatives to amounts presented in accordance with GAAP. The Company does not consider these non-GAAP financial measures to be a substitute for, or superior to, the information provided by GAAP financial results. A reconciliation of the non-GAAP financial measures to the most directly comparable GAAP financial measures is provided below.

#### Adjusted EBITDA

"Adjusted EBITDA", a non-GAAP financial measure, is defined by Kforce, and consistent with the definition included in our credit facility, as net income before depreciation and amortization, stock-based compensation expense, interest expense, net and income tax expense and is a key metric in our covenant calculations. Adjusted EBITDA should not be considered a measure of financial performance under GAAP. Items excluded from Adjusted EBITDA are significant components in

understanding and assessing our past and future financial performance, and this presentation should not be construed as an inference by us that our future results will be unaffected by those items excluded from Adjusted EBITDA. Adjusted EBITDA is a key measure used by management to assess our operations including our ability to generate cash flows and our ability to repay our debt obligations and provides a good metric of our core profitability in comparing our performance to our competitors. Consequently, management believes it is useful information to investors.

#### Free Cash Flow

"Free Cash Flow", a non-GAAP financial measure, is defined by Kforce as net cash provided by (used in) operating activities determined in accordance with GAAP, less capital expenditures. Management believes this provides an additional way of viewing our liquidity that, when viewed with our GAAP results, provides a more complete understanding of factors and trends affecting our cash flows and is useful information to investors as it provides a measure of the amount of cash generated from the business that can be used for strategic opportunities including investing in our business, making acquisitions, repurchasing common stock or paying dividends. Free cash flow has limitations due to the fact that it does not represent the residual cash flow available for discretionary expenditures. Therefore, we believe it is important to view free cash flow as a complement to our financial statements.
