Mellanox's InfiniBand, 10Gb/s and 40Gb/s Ethernet Solutions Are Cloudera 5 Certified

Powering the performance for enterprise data hubs and maximizing the value of customer data

SUNNYVALE, Calif. & YOKNEAM, Israel--(BUSINESS WIRE)-- Mellanox® Technologies, Ltd. (NASDAQ: MLNX), a leading supplier of high-performance, end-to-end interconnect solutions for data center servers and storage systems, today announced that its FDR 56Gb/s InfiniBand, 10Gb/s and 40Gb/s Ethernet solutions are fully certified on Cloudera 5. Mellanox has been certified on all previous versions of Cloudera solutions, including CDH3 and CDH4, so customers can securely deploy their choice of data intensive applications delivering performance, resiliency and cost effectiveness, using Mellanox interconnect solutions.

"Providing a reliable, high-performance interconnect solution is crucial for today's Big Data infrastructures," said Kevin Deierling, vice president of marketing at Mellanox Technologies. "Mellanox's FDR 56Gb/s InfiniBand, 10Gb/s and 40Gb/s Ethernet solutions have been certified to provide the most efficient data transfer capabilities to customer's applications deployed with Cloudera 5."

"With the exponential growth and power in data today, future data center business value depends on the fastest interconnects available," said Tim Stevens, vice president, corporate and business development, Cloudera. "Mellanox's certification of its interconnect solutions on Cloudera 5 ensures customers have the most innovative data management technology available to them and are well-positioned to capture the big data opportunity."

About Mellanox

Mellanox Technologies is a leading supplier of end-to-end InfiniBand and Ethernet interconnect solutions and services for servers and storage. Mellanox interconnect solutions increase data center efficiency by providing the highest throughput and lowest latency, delivering data faster to applications and unlocking system performance capability. Mellanox offers a choice of fast interconnect products: adapters, switches, software and silicon that accelerate application runtime and maximize business results for a wide range of markets including high performance computing, enterprise data centers, Web 2.0, cloud, storage and financial services.
