Numerex Receives Two IoT Evolution Awards

iManage and mySHIELD Garner Honors as 'Product of the Year'

ATLANTA, Sept. 08, 2016 (GLOBE NEWSWIRE) -- Numerex Corp (NASDAQ:NMRX), a leading provider of managed enterprise solutions enabling the Internet of Things (IoT) announced today that two of its IoT Managed Services, iManage™ and mySHIELD™, have each received a 2016 IoT Evolution Product of the Year Award from IoT Evolution magazine and IoT Evolution World, the leading magazine and Web site covering IoT technologies.

iManage enables manufacturing optimization and allows tracking visibility of high value assets such as production parts, assemblies, and racks between factories and suppliers, identifying problems and delays before they become critical. iManage also tracks the location and movements of bins, crates and containers, which helps save time, money and inventory. Lost, stolen, or missing containers can cost companies thousands of dollars per year to replace.

mySHIELD, is a wearable IoT solution designed to enhance the safety of lone workers, the elderly, and other at risk groups. Featuring a small form factor, wireless cellular connectivity, carry or clip on capabilities, and instant access to a live operator via a one push panic button, mySHIELD is the perfect solution to enhance the safety of people in a variety of industries who are often alone, or are likely to find themselves in potentially hazardous situations where safety could be jeopardized such as real estate agents, energy and utility workers, and heavy equipment operators.

Shu Gan, Numerex Chief Marketing Officer commented, "iManage and mySHIELD are two new IoT solutions from Numerex, both combine Device, Network, and Application and are offered as end-to-end managed services from our platform that provide much needed benefits to enterprises and people. We are pleased to see our new IoT solutions being recognized as leaders of the industry and will continue on our path to launch more innovative products and services."

"The solutions selected for the IoT Evolution Product of the Year Award reflect the diverse range of innovation driving the machine to machine market today," said Carl Ford, CEO of Crossfire Media, a co-publisher of IoT Evolution. "It is my pleasure to recognize iManage and mySHIELD as innovative solutions that earned Numerex these 2016 IoT Evolution Product of the Year Awards," said Rich Tehrani, CEO, TMC. "I look forward to seeing more innovation from Numerex in the future." The winners of the 2016 IoT Evolution Product of the Year Award will be published in the next issue of IoT Evolution magazine.

About Numerex

Numerex Corp. (NASDAQ:NMRX) is a leading provider of managed enterprise solutions enabling the Internet of Things (IoT). The Company's solutions produce new revenue streams or create operating efficiencies for its customers. Numerex provides its technology and services through its integrated platforms, which are generally sold on a subscription basis. The Company offers a portfolio of managed end-to-end IoT solutions including smart devices, network connectivity and service applications capable of addressing the needs of a wide spectrum of vertical markets and industrial customers. The Company's mission is to empower enterprise operations with world-class, managed IoT solutions that are simple, innovative, scalable, and secure. Numerex is ISO 27001 information security-certified, highlighting the Company's focus on data security, service reliability and around-the-clock support of its customers.
