Insight Receives Innovative Technology Designation from Vizient, Inc. for HP Elite X3 Device

Designation recognizes products that bring improvements to the health care industry

TEMPE, Ariz., Feb. 07, 2017 (GLOBE NEWSWIRE) -- Insight (NASDAQ:NSIT), a leading provider of Intelligent Technology Solutions™ to organizations of all sizes, announced it has received the Innovative Technology designation for the [HP Elite X3 device](#) from [Vizient, Inc.](#), the largest member-driven health care performance improvement company in the country.

The Innovative Technology designation was given to Insight based on reviews of the HP Elite X3 device by hospital experts who attended Vizient's recent Innovative Technology Exchange. The event provided medical technology suppliers, such as Insight, the opportunity to demonstrate their products and gain direct feedback from 1,300 onsite clinical experts and health care providers. Feedback was focused on the impact products may have on improving clinical care, safety, or benefits to an organization's care and business model.

"Thanks to our relationship with Vizient, Insight can offer [advanced and innovative technology solutions to a vast healthcare network](#)," said Dave Cristal, vice president Insight Public Sector. "Transformative technologies, like the HP Elite X3, allow the Insight team to help our key Healthcare partners improve the patient experience."

"Due to the number of products and services being released and marketed as 'innovative', member hospitals truly value the peer-review system in place at Vizient to help them identify products worth further evaluation at their own facilities," said Debbie Archer, director of procurement and leader of Vizient's Innovative Technology program for suppliers. "After a review of the HP Elite X3 Vizient's member council agreed this solution offers unique and incremental benefit over other products available on the market today, and recommended it for an Innovative Technology designation."

"As our [2016 HP Personal Systems Reseller of the Year for the US Channel](#), I am thrilled to congratulate Insight on their Innovative Technology designation," said Stephanie Dismore, Vice President & General Manager, Americas Channels at [HP](#). "Through partnerships like these, HP is proud to help bring technology to the forefront of the hospital care experience and to ultimately drive better patient outcomes."

The HP Elite X3 combines PC power and productivity with smartphone capabilities as a one-stop-shop device. This allows for seamless access of critical applications for users without having to switch devices. Additionally, HP Elite X3 can process data on-site into useful information, and therefore, serve as a mobile diagnostic lab for on-the-go healthcare professionals who need access to personalized medical information.

Vizient, Inc. represents the combined strengths of the organizations formerly known as VHA Inc., University HealthSystem Consortium, Novation and MedAssets' Spend and Clinical Resource Management. Since 2003, nearly 2200 new and innovative products and technologies have been submitted through the [Vizient Innovative Technology program](#). Vizient works with member-led councils and task forces to identify and review potentially innovative products. If it is determined that a product is innovative, a contract may be awarded outside of Vizient's competitive bid cycle.
