Insight Launches Managed Office Solution

Device-as-a-Service solution gives growing businesses a fully-managed technology experience to expand as they grow

TEMPE, Ariz., Oct. 10, 2017 (GLOBE NEWSWIRE) -- Today, Insight (NASDAQ:NSIT) announced the launch of Insight Managed Office, a device-as-a-service solution that helps clients efficiently manage employee-related technology needs, so they can spend more time accelerating and scaling their businesses. Insight Managed Office is a full-service solution that bundles devices, cloud applications and services under a single monthly subscription, enabling clients to adopt a technology strategy to meet the demands of a changing workforce and rapidly evolving technology landscape with the latest devices and applications that power their productivity.

"Business leaders need to focus on growth and transformation," said Steve Dodenhoff, President, Insight U.S. "The Insight Managed Office solution is designed to be a fully managed offering that helps businesses shift time away from managing day-to-day IT tasks and toward exploring new opportunities for growth."

The [Insight Managed Office](#) solution brings together:

- 1 **Devices**—Clients have access to a variety of the latest Intel® powered devices that employees want to use. Clients can select a new group of devices upon renewal to stay current on their hardware refresh cycle without worrying about cost complexities or the difficulty of changing over to a new device.
- 1 **Applications**—Insight preconfigures each Intel-based device with Microsoft 365 Enterprise to improve team collaboration, productivity and security.
- 1 **Services**—From onboarding and installation to data migration and 24/7 monitoring, Insight provides services and expertise every step of the way. Additionally, the Hot Swap/Spare Program offers clients warranty services for their purchased devices, including dial-in troubleshooting support, replacement hardware delivered overnight and accidental damage coverage.

"As growing businesses continue to transform at increasing rates, they need the tools in place to be productive, secure and adaptive," said Rob Howard, Director, Microsoft Office 365 Ecosystem at Microsoft Corp. "Through its integrations with Microsoft, the Insight Managed Office solution benefits our mutual customers with enhanced collaboration, productivity and security."

Chris Hubbard, Director of PC Sales Enabling at Intel said, "Insight's Managed Office is a great example of using Intel technology to provide a solid foundation for new solutions to transform businesses. Insight's broad selection of devices based on the 7th Generation Intel® Core™ processor provides best-in-class performance and responsiveness for end-user productivity, while also enabling the latest security and manageability features that allow those concerns to be handled by Insight in the background, freeing customers to focus their time and energy on growing their business."

For organizations with more than 5,000 employees, Insight offers Workplace Services to modernize enterprise IT and deliver large organizations the continuity and scale needed to manage their business today and transform for tomorrow.
