## NxStage System One Now in Nine of Top Ten U.S. Nephrology Hospitals

LAWRENCE, Mass., Aug. 24, 2017 /PRNewswire/ -- NxStage Medical, Inc. (Nasdaq: NXTM), [a leading medical technology company focused on advancing renal care](#), today announced that the NxStage® System One™ is now used in nine of the top ten nephrology hospitals in the United States, and fifteen of the top twenty, as identified by *U.S. News & World Report*.<sup>1</sup> The System One simplifies care in acute care settings and allows staff to deliver the prescribed renal replacement therapy via a variety of modalities to critically ill patients.

The System One offers multiple features designed to simplify therapies in hospitals. These features include the NxView interface with graphical touch screen display that provides treatment information and charting assistance, a drop-in cartridge that allows multiple therapies, no waste bags, and no special electrical or plumbing needs. In addition, the System One's range of flow rates allows hospital staff to individualize therapy based on the condition of the patient.

For more information about NxStage System One with NxView visit [www.nxstage.com/hcp](http://www.nxstage.com/hcp).

### About the NxStage System One

The NxStage System One is used to provide a range of flexible therapy options in hospitals and dialysis centers. The System One is also the first and only truly portable hemodialysis system cleared specifically by the FDA for home hemodialysis and home nocturnal hemodialysis. Its simplicity and revolutionary size (just over a foot tall) are intended to allow convenient use in patients' homes and give patients the freedom to travel with their therapy. When combined with the NxStage PureFlow SL Dialysis Preparation System, patients are able to further simplify, using ordinary tap water to create dialysis fluid on demand. Unlike conventional hemodialysis systems, the System One requires no special infrastructure to operate. Under the guidance of their physician, patients can use the NxStage System One, with their trained partners, where, how and when it best meets their needs, including while they are sleeping - at home or on vacation and at a medically appropriate treatment frequency. In addition, NxStage's Nx2me Connected Health platform collects important NxStage System One and patient information for flexible viewing, monitoring and reporting that may improve patient management and patient retention, as well as simplify alternative site care.
