## Rationale for equity issuance

- JPM is raising \$5B in common equity to satisfy a supervisory condition for redemption of all preferred capital issued to the U.S. Treasury under the Troubled Asset Relief Program (TARP)
- We believe all other requirements for repayment have been met
- JPM will fully redeem the \$25B of TARP preferred capital before the end of June, upon receipt of approval

## JPM capital position remains strong

### JPM actual and anticipated capital position (\$ in billions)

	Actual	Anticipated
	As of 3/31/09	as of 6/30/09 <sup>1</sup>
Tier 1 Capital (ex. TARP)	\$112	\$118
Tier 1 Common Capital	88	93
Tier 1 Ratio (ex. TARP)	9.3%	9.3%
Tier 1 Common Ratio	7.3	7.3

- Following the capital raise and TARP preferred capital repayment, JPM expects to have a Tier 1 ratio of 9.3% and a Tier 1 Common ratio of 7.3% at 6/30/09<sup>1</sup>
- JPM anticipates maintaining approximately similar capital levels even in a two-year highly stressed environment

<sup>1</sup> Estimated for 6/30/09 includes capital raise and TARP preferred shares repayment

- Current outlook remains the same as most recent guidance issued on May 27, 2009 (see Appendix), key highlights include:
  - Credit costs will remain high across all lending businesses (IB, RFS, Card, CB); quarterly loss outlooks for RFS and Card (Chase and WaMu) loan portfolios remain unchanged
  - Quarterly revenue outlooks for CB, TSS, AM remain unchanged
  - Expect trading volatility in the IB and the investment portfolio in Corporate
  - One-time items remain unchanged (MSR 1Q results not likely to repeat; FDIC special assessment of \$700mm-\$750mm in 2Q)
