For information about the estimated value of the notes, which likely will be lower than the price you paid for the notes, see the hyperlink above.

Certain Product Characteristics

If the Final Value is greater than the Initial Index Level, you will receive a cash payment that provides you with a return per \$1,000 principal amount note equal to the Index Return multiplied by the Upside Leverage Factor.

If the Final Value is equal to or less than the Initial Index Level by up to the buffer amount, you will receive the principal amount of your notes at maturity. If the Final Value is less than the Initial Value by more than the Buffer Amount, you will lose 1% of the principal amount of your notes for every 1% that the Index has declined beyond the Buffer Amount.

Any payment on the notes is subject to the credit risk of JPMorgan Chase Financial Company LLC, as issuer of the notes and the credit risk of JPMorgan Chase & Co., as guarantor of the notes.

* The final Upside Leverage Factor will be provided in the Pricing Supplement and will not be less than 1.08.

** Reflects an Levered Uncapped Return of 1.08 for illustrative purposes. The hypothetical returns and hypothetical payments on the Notes shown above apply only at maturity. These hypotheticals do not reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns and hypothetical payments shown above would likely be lower.

Hypothetical Returns on the Notes at Maturity**

Hypothetical Index Return	Hypothetical Note Return	Hypothetical Payment at Maturity
80.00%	86.40%	\$1,864.00
50.00%	54.00%	\$1,540.00
40.00%	43.20%	\$1,432.00
30.00%	32.40%	\$1,324.00
20.00%	21.60%	\$1,216.00
10.00%	10.80%	\$1,108.00

Selected Risks

- Your investment in the notes may result in a loss.
- Payment on the notes at maturity is subject to our credit risk. Therefore the value of the notes prior to maturity will be subject to changes in the market's view of our creditworthiness.
- If the Final Value declines from its Initial Value by more than 15%, you could lose up to \$850 for each \$1,000 note.
- No interest payments, dividend payments or voting rights.
- The tax consequences of the notes may be uncertain. You should consult your tax advisor regarding the U.S. federal income tax consequences of an investment in the notes.

Selected Risks (continued)

- JPMS's estimated value will be lower than the original issue price (price to public) of the notes.
- JPMS's estimated value is not determined by references to our credit spreads for our conventional fixed rate debt.
- JPMS's estimated value does not represent future values and may differ from others' estimates.
- The value of the notes, which may be reflected in customer account statements, may be higher than JPMS's current estimated value for a limited time period.
- Lack of liquidity: J.P. Morgan Securities LLC, acting as agent for the Issuer (and who we refer to as JPMS), intends to offer to purchase the notes in the secondary market but is not required to do so. The price, if any, at which JPMS will be willing to purchase notes from you in the secondary market, if at all, may result in a significant loss of your principal.
- Potential conflicts: We and our affiliates play a variety of roles in connection with the issuance of notes, including acting as calculation agent and hedging our obligations under the notes, and making the assumptions used to determine the pricing of the notes and the estimated value of the notes when the terms of the notes are set. It is possible that such hedging or other trading activities of J.P. Morgan or its affiliates could result in substantial returns for J.P. Morgan and its affiliates while the value of the notes decline.

The risks identified above are not exhaustive. Please see "Risk Factors" in the applicable product supplement and "Selected Risk Considerations" in the applicable preliminary pricing supplement for additional information.
