

**For people. For the environment.
For the shared goal of a healthier future.**

PerkinElmer, Inc. is a global leader focused on improving the health and safety of people and their environment. Engaged in a proactive fight against illness, including contamination and other threats to our well-being, PerkinElmer conceives and delivers scientific solutions to meet society's ever-changing needs. Our mission ranges from fostering earlier insights and more effective therapies to facilitating cleaner water and safer buildings where we work, learn and play. For people and the environment, we take action to create a better tomorrow.

HUMAN HEALTH

Our diagnostic and research instrumentation technologies, reagents and software are backed by clinical resources and support services to help fight disease more proactively, provide medical insights more accurately and develop therapies more quickly. We are:

- A global leader in first trimester pre-natal screening and neonatal screening that saves the lives of 40 babies every day
- The # 2 umbilical cord blood banking provider for treating 70 life-threatening diseases
- Makers of technology that touches more than 27 million births and pregnancies per year
- Driving the development of tomorrow's most effective treatments with the world's largest portfolio of biological and functional technologies for cellular science research
- The world's leading supplier of amorphous silicon digital x-ray detectors to preserve healthy tissue and speed recovery time for cancer patients
- Makers of Xenon lighting technology for ideal visualization in some of medicine's most demanding applications, including endoscopic surgery
- The world leading provider of radiometric detection and reagents, multi-mode plate readers and flat panels for digital x-ray imaging systems
- Integral to drug discovery with the largest GPCR and Kinase product portfolios, accounting for over 75% of drug pathways

ENVIRONMENTAL HEALTH

PerkinElmer is dedicated to the quality and sustainability of the environment. With our analytical instrumentation, illumination and detection technologies, and leading laboratory services, we focus on improving the integrity and safety of the world we live in. We are:

- Makers of the environmental monitoring and renewable energy testing technologies for a cleaner planet
- Designers of sensors that reduce CO2 emissions by 22 million metric tons per year
- The most experienced multi-vendor service organization in the analytical industry, with over 400 multi-vendor customers and over 10 years of experience
- A market leading provider of analytical techniques – #1 in Inorganic, #2 in Molecular Spectroscopy and Thermal Analysis and #3 in Gas Chromatography
- A strong service organization and the #1 provider of comprehensive multi-vendor laboratory management services for analytical equipment.
