Pervasive Software Highlights SaaS, Out-of-the-Box and Data Center Integration at Metamorphosis 7.0

Interactive Summit Lets Global Customers and Partners Share Real-World Integration Experiences

AUSTIN, TEXAS – April 30, 2007 – Pervasive Software® Inc. (NASDAQ: PVSW), a global value leader in embeddable data management and integration software, today announced Metamorphosis 7.0, its seventh Independent Software Vendor (ISV), Systems Integrator (SI), Software-as-a-Service (SaaS) vendor and Business Service Provider (BSP) executive summit, will be held May 3-4, 2007 at the San Jose Marriott in San Jose, Calif. Metamorphosis 7.0 offers a compendium of integration best practices and real-world experiences, including hands-on knowledge of complex integrations between SaaS and on-premises applications. The ISVs, SIs, BSPs and SaaS vendors presenting come from a wide variety of industries, such as healthcare and financial services, to educate one another on successful business and technology strategies that drive high-ROI and rapid results for customers leveraging Pervasive’s agile, embeddable integration.

Attendees of the two-day summit will have the opportunity to hear keynote speaker Jeff Kaplan, managing director of THINKstrategies, outline how organizations can benefit from the evolving integration landscape during his presentation “Turning Integration into a Competitive Advantage: Capitalizing on Rapidly Changing Markets.” In addition to technical breakout sessions, participants will focus on gaining competitive advantage by getting the “straight scoop” directly from the people who utilize lightweight, rapid integration to meet business goals, including:

- Steve Woods, CTO, Eloqua
- Andrew Leigh, Director, Integration Product Marketing, Salesforce.com
- George Jacquette, Group Product Manager, QuickBooks, Intuit Software
- Jimmy Duan, VP of Client Services, Xactly
- Patrick Jin, Director Solutions Development, Epicor
- Jayant Pal, Manager, Advantage Product Line, CGI-AMS
- Jack Hakim, CEO, EC Wise

“If you’re evaluating any integration technology, you should attend Metamorphosis. I thought it was a great event – one of the best events I’ve been to,” said Kevin Kaspszak, senior vice president of product development at Response Analytics. “While the conference was organized by Pervasive, the ISVs, systems integrators and others presenting – and their stories – were clearly the focus.”

“The rapidly expanding integration challenges that many companies are facing and new considerations such as how to successfully adopt the SaaS business model are compelling reasons to gather current and prospective partners in one place to share best practices,” said Mike Hoskins, CTO of Pervasive. “Metamorphosis 7.0 provides the platform for our partners to openly present their methods of tackling those challenges for the benefit of others in the industry. Their creative and innovative implementations will highlight not only the need for agile integration but the value of integration speed and economics in an increasingly SaaS-based world.”

About Pervasive Integration

Pervasive’s embeddable integration software takes the agony out of moving and sharing data within and between organizations. It allows users to quickly and easily share information between multiple databases, applications, or hosted business systems. The capability is lightweight and fits into virtually any environment while adapting quickly to change. Combining robust technology and more than 20 years of data integration expertise, Pervasive delivers a multi-purpose integration platform that allows customers to re-use the same software for diverse integration scenarios. With more than 150 data and application connectors within a single product, Pervasive helps customers achieve accelerated ROI. In addition, Pervasive’s technology and business model supports low-cost adoption by non-programmers for small data volumes all the way to complex, high-volume multi-processor implementations that handle millions of transactions.
