QuickLogic Signs Agreement with Second Top-Tier Foundry for ArcticPro™ eFPGA IP

SUNNYVALE, CA -- (Marketwired) -- 02/14/17 -- QuickLogic Corporation (NASDAQ: QUIK), a developer of ultra-low power programmable sensor processing, embedded FPGA IP, display bridge and programmable logic solutions, today announced that it has signed an agreement with a second top-tier foundry to port, and market for licensing, the company's [ArcticPro](#) embedded FPGA (eFPGA) technology. This agreement expands the availability of QuickLogic's ArcticPro eFPGA IP to semiconductor companies and OEMs that are developing new designs targeting this foundry's high volume 40nm fabrication process.

"We believe there will be a strong need in the future for more heterogeneous computing and programmability at the edge of the network," said Brian Faith, president and CEO at QuickLogic Corporation. "QuickLogic's ArcticPro eFPGA foundry agreements enable this trend by providing semiconductor companies and OEMs the ability to add hardware programmability to SoC and ASIC designs."

The 40nm process is optimized for low power consumption, which is a common requirement for SoCs targeting the rapidly growing IoT market. By adding the flexibility enabled by QuickLogic's ultra-low-power ArcticPro eFPGA technology, new SoC designs can address broader markets, changing standards, incorporate new features and extend the life of the SoC design.

QuickLogic's FPGA technology and software development tools are proven solutions, time-tested over nearly three decades of shipping over 40 million FPGA devices to thousands of customers across multiple markets including consumer, industrial and military. Customers can initiate evaluation of this new ArcticPro eFPGA technology for their own applications starting this month for production tape-outs in Q3 of this year.

Conference Call

QuickLogic Corporation (NASDAQ: QUIK) will hold a conference call at 2:30 p.m. Pacific Standard Time/ 5:30 p.m. Eastern Standard Time, February 15, 2017, to discuss its current financial results. The conference call will be webcasted and can be accessed via the Company's website at <http://ir.quicklogic.com/events.cfm>. To join the live conference, you may dial (877) 377-7094 by 2:20 p.m. Pacific Standard Time. A recording of the call will be available starting one hour after completion of the call. To access the recording, please call (404) 537-3406 and reference the passcode: 50904830. The call recording will be archived until Wednesday, February 22, 2017 and the webcast will be available for 12 months on the Company's website.

About QuickLogic

QuickLogic Corporation (NASDAQ: QUIK) enables OEMs to maximize battery life for highly differentiated, immersive user experiences with Smartphone, Wearable and IoT devices. QuickLogic delivers these benefits through industry leading ultra-low power customer programmable SoC semiconductor solutions, embedded software, and algorithms for always-on voice and sensor processing. The company's embedded FPGA initiative also enables SoC designers to easily implement post production changes, and increase revenue by providing hardware programmability to their end customers.
