About Reis

Reis provides commercial real estate market information and analytical tools to real estate professionals through its Reis Services subsidiary. Reis Services, including its predecessors, was founded in 1980. Reis maintains a proprietary database containing detailed information on commercial properties in metropolitan markets and neighborhoods throughout the U.S. The database contains information on apartment, office, retail, warehouse/distribution, flex/research & development, self storage, seniors housing, student housing and affordable housing properties, and is used by real estate investors, lenders and other professionals to make informed buying, selling and financing decisions. In addition, Reis data is used by debt and equity investors to assess, quantify and manage the risks of default and loss associated with individual mortgages, properties, portfolios and real estate backed securities. Reis currently provides its information services to many of the nation's leading lending institutions, equity investors, brokers and appraisers.

The Company's product portfolio features: *Reis SE*, its flagship delivery platform aimed at larger and mid-sized enterprises; *ReisReports*, aimed at prosumers and smaller enterprises; *Reis Portfolio CRE*, and other portfolio support products and services, aimed primarily at risk managers and credit administrators at banks and non-bank lending institutions. It is through these products that Reis provides online access to a proprietary database of commercial real estate information and analytical tools designed to facilitate debt and equity transactions as well as ongoing asset and portfolio evaluations. Depending on the product or level of entitlement, users have access to market trends and forecasts at metropolitan and neighborhood levels throughout the U.S. and/or detailed building-specific information such as rents, vacancy rates, lease terms, property sales, new construction listings and property valuation estimates. Reis's products are designed to meet the demand for timely and accurate information to support the decision-making of property owners, developers, builders, banks and non-bank lenders, equity investors and service providers. These real estate professionals require access to timely information on both the performance and pricing of assets, including detailed data on market transactions, supply, absorption, rents and sale prices. This information is critical to all aspects of valuing assets and financing their acquisition, development and construction.
