Red Hat CEO Jim Whitehurst to Deliver Keynote Address at Open Source Business Conference

RALEIGH, N.C.--(BUSINESS WIRE)-- Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that president and CEO, Jim Whitehurst, will deliver the keynote address at *Computerworld's* Open Source Business Conference (OSBC) on May 21, 2012. **OSBC 2012** features content-rich sessions from visionary thought leaders and industry executives on how open source technology is being used and what the implications are from a business perspective, and the conference offers the chance to connect with the developers, users and companies behind some of the most significant open source, mobile and cloud technologies.

Traditional IT, long the object of ridicule, has finally reached its "escape velocity" and is emerging from the data center to fundamentally shape business and our lives in multiple ways. Today, growing computing power, combined with falling costs, is driving technology's own ubiquity. In his visionary keynote address, Whitehurst will describe the profound mega-trends he believes have been unleashed as a result of the prevalence of computing and communications, and explain how these mega-trends help drive new dynamics that have contributed to an explosion of innovation, radical new business models and fundamental shifts in governance.

Forward-Looking Statements

Certain statements contained in this press release may constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including: risks related to delays or reductions in information technology spending; the effects of industry consolidation; the ability of the Company to compete effectively; uncertainty and adverse results in litigation and related settlements; the integration of acquisitions and the ability to market successfully acquired technologies and products; the inability to adequately protect Company intellectual property and the potential for infringement or breach of license claims of or relating to third party intellectual property; the ability to deliver and stimulate demand for new products and technological innovations on a timely basis; risks related to data and information security vulnerabilities; ineffective management of, and control over, the Company's growth and international operations; fluctuations in exchange rates; and changes in and a dependence on key personnel, as well as other factors contained in our most recent Annual Report on Form 10-K (copies of which may be accessed through the Securities and Exchange Commission's website at <http://www.sec.gov>), including those found therein under the captions "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations". In addition to these

factors, actual future performance, outcomes, and results may differ materially because of more general factors including (without limitation) general industry and market conditions and growth rates, economic and political conditions, governmental and public policy changes and the impact of natural disasters such as earthquakes and floods. The forward-looking statements included in this press release represent the Company's views as of the date of this press release and these views could change. However, while the Company may elect to update these forward-looking statements at some point in the future, the Company specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing the Company's views as of any date subsequent to the date of this press release.
