Rockwell Medical Announces Triferic® Poster Presentations at the National Kidney Foundation (NKF) Spring Clinical Meeting in Orlando, FL April 18-22, 2017

WIXOM, Mich., April 10, 2017 (GLOBE NEWSWIRE) -- Rockwell Medical, Inc. (NASDAQ:RMTI), a fully-integrated biopharmaceutical company targeting end-stage renal disease (ESRD) and chronic kidney disease (CKD) with innovative products for the treatment of iron replacement, secondary hyperparathyroidism and hemodialysis, announced today a poster presentation at the National Kidney Foundation Spring Clinical Meeting, Wednesday, April 19th at 6:00PM - 7:30PM EDT during the opening session in the exhibit hall at the Swan and Dolphin Exhibit Hall in Orlando, FL.

Poster Presentations:

[Ferric Pyrophosphate Citrate \(Triferic\): One Month Intraperitoneal Toxicology](#)

Raymond D. Pratt, MD, John Dilberger, Ph.D. and Ajay Gupta, MD
Rockwell Medical, Inc., Wixom, MI, USA

Wednesday, April 19th between 6:00PM - 7:30PM in the exhibit hall

[Ferric Pyrophosphate Citrate \(Triferic\): Toxicokinetic Study Pharmacokinetics of Triferic Administered IV and via Dialysate](#)

Raymond D. Pratt, MD, Sarah Grimberg and Ajay Gupta, MD
Rockwell Medical, Inc., Wixom, MI, USA

Wednesday, April 19th between 6:00PM - 7:30PM in the exhibit hall

For more information on the National Kidney Foundation Spring Clinical Meeting, refer to <https://www.kidney.org/spring-clinical>

About Triferic

Triferic is the only FDA approved drug indicated to replace iron and maintain hemoglobin in hemodialysis patients suffering from anemia. Via dialysate during each dialysis treatment, Triferic replaces the 5-7 mg iron loss that occurs in all patients, effectively maintaining their iron balance. Unlike IV iron products, Triferic binds iron immediately and completely to transferrin (carrier of iron in the body) upon entering the blood and it is then transported directly to the bone marrow to be incorporated into hemoglobin, with no increase in ferritin (stored iron and inflammation) and no anaphylaxis, addressing a significant unmet need in overcoming Functional Iron Deficiency (FID) in ESRD patients. Please visit www.triferic.com to view the Triferic mode-of-action (MOA) video and for more information.

About Rockwell Medical

Rockwell Medical is a fully-integrated biopharmaceutical company targeting end-stage renal disease (ESRD) and chronic kidney disease (CKD) with innovative products and services for the treatment of iron replacement, secondary hyperparathyroidism and hemodialysis.

Rockwell's recent FDA approved drug Triferic is indicated for iron replacement and maintenance of hemoglobin in hemodialysis patients. Triferic delivers iron to patients during their regular dialysis treatment, using dialysate as the delivery mechanism. Triferic has demonstrated that it safely and effectively delivers sufficient iron to the bone marrow and maintains hemoglobin, without increasing iron stores (ferritin). Rockwell intends to market Triferic to hemodialysis patients in the U.S. dialysis market and globally.

Rockwell's FDA approved generic drug Calcitriol is for treating secondary hyperparathyroidism in dialysis patients. Calcitriol (active vitamin D) injection is indicated in the management of hypocalcemia in patients undergoing chronic renal dialysis. It has been shown to significantly reduce elevated parathyroid hormone levels. Reduction of PTH has been shown to result in an improvement in renal osteodystrophy. Rockwell intends to market Calcitriol to hemodialysis patients in the U.S. dialysis market.

Rockwell is also an established manufacturer and leader in delivering high-quality hemodialysis concentrates/dialysates to dialysis providers and distributors in the U.S. and abroad. As one of the two major suppliers in the U.S., Rockwell's products are used to maintain human life by removing toxins and replacing critical nutrients in the dialysis patient's bloodstream. Rockwell has three U.S. manufacturing/distribution facilities.

Rockwell's exclusive renal drug therapies support disease management initiatives to improve the quality of life and care of dialysis patients and are intended to deliver safe and effective therapy, while decreasing drug administration costs and improving patient convenience. Rockwell Medical is developing a pipeline of drug therapies, including extensions of Triferic for indications outside of hemodialysis. Please visit www.rockwellmed.com for more information.

Certain statements in this press release constitute "forward-looking statements" within the meaning of the federal securities laws, including, but not limited to, Rockwell's intention to sell and market Calcitriol and Triferic.
