

Supplemental Financial Data

Key Financial and Operational Measures and Non-GAAP Financial Measures

Third Quarter 2017

This Supplemental Financial Data package provides key financial and operational data as well as reconciliations of those non-GAAP financial measures that SBA Communications Corporation (“SBA” or “We”) use in evaluating the performance of our business.

These non-GAAP financial measures include (1) Cash Site Leasing Revenue, (2) Core Recurring Cash Leasing Revenue, (3) Tower Cash Flow and Tower Cash Flow Margin, (4) Adjusted EBITDA, Annualized Adjusted EBITDA, and Adjusted EBITDA Margin, (5) Return on Invested Capital, (6) Net Debt, Net Secured Debt, Leverage Ratio, Net Cash Interest Coverage Ratio, and Secured Leverage Ratio, (7) Funds From Operations, Adjusted Funds From Operations, and Adjusted Funds From Operations Per Share and (8) certain financial metrics after eliminating the impact of changes in foreign currency exchange rates (collectively, our “Constant Currency Measures”) and other identified non-recurring items. The following pages provide reconciliations of these non-GAAP financial measures to their most comparable GAAP measures and the other information required by Regulation G.

Key Financial and Operational Measures

Bridge of 2016 Total Site Leasing Revenue to Updated 2017 Guidance (\$M)

■ Indicates a reduction in total site leasing revenue

1. Represents core recurring cash leasing revenue (a non-GAAP metric), which is the basis for our calculated same tower organic growth and churn rates
 2. Includes contributions from acquisitions and new infrastructure builds
 3. Includes pass-through reimbursable expenses, amortization of capital contributions for tower augmentations, managed and non-macro business and other miscellaneous items
 4. Based on guidance issued on Oct 30, 2017

1. Translated at foreign currency exchange rates based on guidance issued Oct 30, 2017 (2018 projections assume the same exchange rates as 2017)
2. Non-cash straight-line revenue represents the difference between the revenue that we are required to recognize in accordance with GAAP for the period presented and the cash that we receive under the relevant lease for the period presented. For purposes of calculating the 2017 and 2018 projections above, we assume only those escalators that are currently in place. For a more detailed discussion of our revenue recognition policy, please review our "Critical Accounting Policies" in our Form 10-K.
3. Non-cash straight-line ground lease expense represents the difference between the ground lease expense that we are required to recognize in accordance with GAAP for the period presented and the cash that we actually pay under the relevant ground lease for the period presented. For purposes of calculating the 2017 and 2018 projections above, we assume only those escalators that are currently in place. For a more detailed discussion of our revenue recognition policy, please review our "Critical Accounting Policies" in our Form 10-K.

Constant Currency Measures

We eliminate the impact of changes in foreign currency exchange rates for each of the following financial metrics (collectively, our “Constant Currency Measures”) by dividing the current period’s financial results by the average monthly exchange rates of the prior year period. The table below provides the reconciliation of the reported growth rate year-over-year, of each of the measures included in the table, to the growth rate after eliminating the impact of changes in foreign currency exchange rates to such measure.

We believe that our Constant Currency Measures provide management and investors the ability to evaluate the performance of the business without the impact of foreign exchange fluctuations.

Cash Site Leasing Revenue, Tower Cash Flow and Tower Cash Flow Margin

Cash Site Leasing Revenue is defined as site leasing revenue less non-cash straight-line site leasing revenue. Tower Cash Flow is defined as Cash Site Leasing Revenue less site leasing cost of revenues net of non-cash straight-line ground lease expense and Tower Cash Flow Margin is defined as Tower Cash Flow divided by Cash Site Leasing Revenue. We discuss these non-GAAP financial measures because we believe these items are indicators of performance of our site leasing operations. In addition, Tower Cash Flow is a component of the calculation used by our lenders to determine compliance with certain covenants under our Senior Credit Agreement. Neither Cash Site Leasing Revenue, Tower Cash Flow nor Tower Cash Flow Margin are intended to be alternative measures of site leasing gross profit nor of site leasing gross profit margin as determined in accordance with GAAP.

The quarterly reconciliation of Cash Site Leasing Revenue and Tower Cash Flow and the calculation of Tower Cash Flow Margin is as follows:

Adjusted EBITDA, Annualized Adjusted EBITDA and Adjusted EBITDA Margin

Adjusted EBITDA is defined as net income (loss) excluding the impact of interest expense, interest income, provision for or benefit from taxes, depreciation, accretion and amortization, asset impairment and decommission costs, non-cash compensation, loss/(gain) from extinguishment of debt, net, other (income) and expense, acquisition related adjustments and expenses, income from discontinued operations, non-cash straight-line leasing revenue, and non-cash straight-line ground lease expense. Adjusted EBITDA excludes acquisition related costs which, pursuant to the adoption of new business combination accounting guidance, are expensed and included within operating expenses. Annualized Adjusted EBITDA is calculated as Adjusted EBITDA for the most recent quarter multiplied by four. Adjusted EBITDA Margin is defined as Adjusted EBITDA divided by the difference of total revenue minus non-cash straight-line leasing revenue.

Adjusted EBITDA is useful to investors or other interested parties in evaluating our financial performance. Adjusted EBITDA is the primary measure used by management (1) to evaluate the economic productivity of our operations and (2) for purposes of making decisions about allocating resources to, and assessing the performance of, our operations. Management believes that Adjusted EBITDA helps investors or other interested parties meaningfully evaluate and compare the results of our operations (1) from period to period and (2) to our competitors, by excluding the impact of our capital structure (primarily interest charges from our outstanding debt) and asset base (primarily depreciation, amortization and accretion) from our financial results. Management also believes Adjusted EBITDA is frequently used by investors or other interested parties in the evaluation of REITs. In addition, Adjusted EBITDA is similar to the measure of current financial performance generally used in our debt covenant calculations. Adjusted EBITDA should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance.

Funds From Operations, Adjusted Funds From Operations and Adjusted Funds From Operations Per Share

Funds From Operations, or FFO, is defined as net income (loss) plus real estate related depreciation, amortization and accretion. Adjusted Funds From Operations, or AFFO, is defined as FFO adjusted to remove the impact of non-cash straight-line leasing revenue, non-cash straight-line ground lease expense, non-cash compensation, changes in the non-cash portion of our reported tax position, non-real estate related depreciation, amortization and accretion, amortization of deferred financing costs and debt discounts, gain (loss) from extinguishment of debt, net, other (income) and expense, acquisition related adjustments and expenses, asset impairment and decommission costs, and non-discretionary cash capital expenditures. AFFO Per Share is defined as AFFO divided by the weighted number of shares outstanding, adjusted to include the dilutive effect of stock options and restricted stock units.

FFO, AFFO and AFFO per share, which are metrics used by our public company peers in the communication site industry, provide investors useful indicators of the financial performance of our business and permit investors an additional tool to evaluate the performance of our business against those of our two principal competitors. On October 3, 2016, SBA's Board authorized SBA to take the steps necessary to be subject to tax as a REIT commencing with the taxable year ending December 31, 2016. We believe that we are operating in a manner that complies with the REIT rules as of January 1, 2016. As a result, we have updated our definition of FFO. Under the revised definition, FFO no longer includes an adjustment to reflect our estimate of our cash taxes had we been a REIT. However, AFFO continues to exclude the non-cash portion of our reported tax provision. We refer to the prior definition as FFO, as previously defined. FFO, AFFO, and AFFO per share are also used to address questions we receive from analysts and investors who routinely assess our operating performance on the basis of these performance measures, which are considered industry standards. We believe that FFO helps investors or other interested parties meaningfully evaluate financial performance by excluding the impact of our asset base (primarily depreciation, amortization and accretion). We believe that AFFO and AFFO per share help investors or other interested parties meaningfully evaluate our financial performance as they include (1) the impact of our capital structure (primarily interest expense on our outstanding debt) and (2) sustaining capital expenditures and exclude the impact of our (1) asset base (primarily depreciation, amortization and accretion) and (2) certain non-cash items, including straight-lined revenues and expenses related to fixed escalations and rent free periods. GAAP requires rental revenues and expenses related to leases that contain specified rental increases over the life of the lease to be recognized evenly over the life of the lease. In accordance with GAAP, if payment terms call for fixed escalations, or rent free periods, the revenue or expense is recognized on a straight-lined basis over the fixed, non-cancelable term of the contract. We only use AFFO as a performance measure. AFFO should be considered only as a supplement to net income computed in accordance with GAAP as a measure of our performance and should not be considered as an alternative to cash flows from operations or as residual cash flow available for discretionary investment. We believe our definition of FFO is consistent with how that term is defined by the National Association of Real Estate Investment Trusts ("NAREIT") and that our definition and use of AFFO and AFFO per share is consistent with those reported by the other communication site companies.

(1) Adjustments for unconsolidated joint ventures represent (a) with respect to the calculation of FFO, that portion of the joint ventures' depreciation, amortization and accretion to the extent included in our net income and (b) with respect to the calculation of AFFO, that portion of the joint ventures' straight-line leasing revenue and ground lease expense, other (income) expense and acquisition related adjustments and expenses, in each case to the extent included in our net income.

(2) For Q4 of 2015 through Q2 of 2016, amount adjusts the income tax provision to reflect our estimate of cash income taxes (primarily foreign taxes) that would have been payable had we been a REIT. For Q3 of 2016 through Q3 of 2017, amount removes the non-cash portion of the tax provision for the period specified.

(3) For purposes of the AFFO per share calculation, the basic weighted average number of common shares has been adjusted to include the dilutive effect of stock options and restricted stock units.

Net Debt, Leverage Ratio and Net Cash Interest Coverage Ratio

Net Debt is defined as the notional principal amount of outstanding debt minus cash and cash equivalents, short-term investments, and short-term restricted cash. Net Secured Debt is defined as the notional principal amount of outstanding secured debt minus cash and cash equivalents, short-term investments, and short-term restricted cash. Under GAAP policies, the notional principal amount of the Company's outstanding debt is not necessarily reflected on the face of the Company's financial statements. Leverage Ratio is defined as Net Debt divided by Annualized Adjusted EBITDA. Secured Leverage Ratio is defined as Net Secured Debt divided by Annualized Adjusted EBITDA. Net cash interest coverage ratio is defined as Adjusted EBITDA divided by Net Cash Interest Expense. We believe that by including the full amount of the notional principal amount due at maturity for purposes of calculating net debt, and, to the extent that such measures are calculated on net debt, by excluding cash and cash equivalents, it will provide investors a more complete understanding of our net debt and leverage position. We have included these non-GAAP financial measures because we believe these items are indicators of our financial condition, and they are used by our lenders to determine compliance with certain covenants under our Senior Credit Agreement, 2014 Senior Notes, 2016 Senior Notes, and 2017 Senior Notes.
