Semtech to Feature LoRa Technology at The Computing Conference 2017

LoRa Technology, the ideal platform for IoT applications in a variety of verticals to improve operational efficiency and impact society

CAMARILLO, Calif., Oct. 09, 2017 (GLOBE NEWSWIRE) -- [Semtech Corporation](#) (Nasdaq:SMTC), a leading supplier of high performance analog and mixed-signal semiconductors and advanced algorithms, is displaying its [LoRa® devices and wireless RF technology \(LoRa Technology\)](#) at [The Computing Conference 2017](#), hosted by Alibaba Cloud, in Hangzhou, China on October 11 - 14 in booth CT-106.

Semtech will demonstrate next-generation IoT applications that impact society and improve operational efficiencies while increasing energy savings for smart homes and smart cities (i.e. monitoring indoor temperature and street light dimming). LoRa Technology's key capabilities - long range, low power and low cost - make the platform an ideal choice for IoT applications worldwide. The platform reduces up front infrastructure investments and operating costs while allowing verticals to develop specific use case applications that address current societal challenges.

"The Computing Conference emphasizes China's growing support of Internet of Things (IoT) and the desire to incorporate smart solutions throughout its cities - whether it is for smart homes, smart cities or smart metering," said Mike Wong, Vice President for Semtech's Wireless and Sensing Products Group. "Semtech's LoRa Technology helps China better serve its community by implementing smart devices that achieve greater connectivity and productivity."

About Semtech's LoRa® Devices and Wireless RF Technology

Semtech's LoRa devices and wireless RF technology is a widely adopted long-range, low-power solution for IoT that gives telecom companies, IoT application makers and system integrators the feature set necessary to deploy low-cost, interoperable IoT networks, gateways, sensors, module products, and IoT services worldwide. IoT networks based on the LoRaWAN™ specification have been deployed in over 60 countries and Semtech is a founding member of the LoRa Alliance™, the fastest growing IoT Alliance for Low Power Wide Area Network applications. To learn more about how LoRa enables IoT, visit Semtech's [LoRa site](#) and join the [LoRa Community](#) to access free training as well as an online industry catalog showcasing the products you need for building your ideal IoT application.

About Semtech

Semtech Corporation is a leading supplier of high performance analog and mixed-signal semiconductors and advanced algorithms for high-end consumer, enterprise computing, communications, and industrial equipment. Products are designed to benefit the engineering community as well as the global community. The Company is dedicated to reducing the impact it, and its products, have on the environment. Internal green programs seek to reduce waste through material and manufacturing control, use of green technology and designing for resource reduction. Publicly traded since 1967, Semtech is listed on the Nasdaq Global Select Market under the symbol SMTC. For more information, visit www.semtech.com.

Forward-Looking and Cautionary Statements
