**SILVER STANDARD PROVIDES Q1 2012 PIRQUITAS OPERATIONS AND CORPORATE UPDATE**

VANCOUVER, B.C. -- Silver Standard Resources Inc. (NASDAQ: SSRI, TSX: SSO) (“Silver Standard” or the “Company”) announced today an operational update for its Pirquitas silver mine in Argentina, and other corporate activities.

**First Quarter 2012 Highlights**

*(All figures are in U.S. dollars unless otherwise noted)*

- | Produced 2.2 million ounces of silver, a 24% quarter-on-quarter increase.
- | Lowered direct mining costs to \$11.71 per ounce of silver produced, a 22% quarter-on-quarter improvement.
- | Operated the debottlenecked plant at an average of 4,567 tonnes per day throughput, a rate 14% above nominal design.
- | Contractually delivered 1.5 million ounces of silver through spot sale agreements.
- | Entered into two long-term silver concentrate sales contracts with smelters for 60% of monthly production commencing April 2012.
- | Subsequent to the quarter, enhanced corporate liquidity by realizing gross cash proceeds of C\$70 million from exercised Pretium Resources Inc. (“Pretium”) share purchase warrants pursuant to the secondary offering completed last year.

“These first quarter results are a continuation of the strong operating performance since the restart of the ball mill in November 2011,” said John Smith, President and CEO. “The operating discipline in place at Pirquitas is focused on consistent, reliable and safe results quarter-on-quarter. Increasing production is one of our approaches to reduce direct mining cost per ounce at Pirquitas, and the first quarter is an example of that. These results, in addition to the Pretium warrant exercise, further strengthen our liquidity and position Silver Standard for a strong 2012.”

## Summary of Mine Operating Statistics

		Q4 2011	Q1 2012	% Change
Total Material Mined	Kt	4,640	4,297	(7%)
Ore Processed	Kt	241	416	73%
Silver Mill Feed Grade	g/tonne	274	221	(19%)
Silver Recoveries	%	82.4	77.3	(6%)
Silver Produced	'000 oz.	1,751	2,172	24%
Zinc Produced	'000 lbs.	843	3,324	295%
Direct Mining Cost <sup>(1)</sup>	US\$/oz.	\$14.97	\$11.71	(22%)
Silver Ounces Contractually Delivered	'000 oz.	515	1,536	198%
Zinc Pounds Contractually Delivered	'000 lbs.	1,941	1,791	(8%)

(1) The Company reports non-GAAP cost per ounce of silver produced to manage and evaluate operating performance at the Pirquitas mine. For a better understanding and a reconciliation of these measures to cost of sales, as shown in our Consolidated Statement of Income (Loss) please refer to 'Non-GAAP Financial Measures' contained in the Company's MD&A for the year ended December 31, 2011 filed on SEDAR.

### Mine Operations

The Pirquitas mine produced 2.2 million ounces of silver during Q1 2012 compared with 1.8 million ounces in Q4 2011. The strong production was the result of improvements made to the crusher, the ball mill gearbox and several operating processes in 2011 and 2012. The mine also produced 3.3 million pounds of zinc in Q1 2012, which met expectations for the quarter.

During the quarter, approximately 416,000 tonnes of ore were processed at an average milling rate of 4,567 tonnes per day, compared to approximately 241,000 tonnes at an average of 2,618 tonnes per day in Q4 2011. The average milling rate of 4,567 tonnes per day in Q1 2012 is 14% higher than the plant's nominal design. The Q1 2012 outperformance resulted from continuous improvement initiatives including improved crushing, milling circuit efficiencies, improved preventative maintenance practices and proper mill feed selection. At these higher operating rates, the plant achieved near design silver recoveries.

Ore milled during Q1 2012 contained an average silver grade of 221 g/t and an average silver recovery of 77.3% . This compared to a silver grade of 274 g/t and recovery of 82.4% in Q4 2011. The lower silver grade during Q1 2012 compared to Q4 2011 was due to feeding the plant average reserve grade material versus above-average grade material in Q4 2011. Operating results were in-line with budget expectations for the quarter.

Diamond drilling began at Cortaderas Valley in March. This drilling program is focused on upgrading a portion of the Cortaderas Valley mineralization to the Measured and Indicated mineral resource category and adding to mineral resources by testing new target areas identified from gravity and 'Titan 24' induced polarization surveys completed earlier in Q1 2012. To date, six holes have been completed for a combined length of 2,716 meters, or about 12% of the planned drilling campaign of 22,350 meters. The assay results of these six holes are expected in Q2 2012. A second diamond drill rig has been mobilized to pursue geophysical anomalies on the southern border of the San Miguel open-pit.

### **Mine Tour of Pirquitas**

The Company will be hosting a tour for equity research analysts and buy-side investors to the Pirquitas mine on April 26, 2012. The mine tour will include a review of Q1 2012 operating results, operational improvements and exploration potential. Presentation slides to be used during the mine tour will be available under 'Presentations and Webcasts' in the Investors section of [www.silverstandard.com](http://www.silverstandard.com).

### **Pretium Resources Equity Interest**

As a result of the Pretium secondary offering that closed on April 8, 2011, unitholders exercised 5.6 million share purchase warrants of Pretium by April 9, 2012. Silver Standard received gross cash proceeds of C\$70.0 million from the exercise of the Pretium share purchase warrants. Silver Standard now holds 19.1 million Pretium shares or 21.6% of Pretium's issued and outstanding shares.
