Skyworks Expands Industry Leading LTE Solutions for Internet of Things Applications

Capitalizes on Growing Demand for Secure and Dependable, Low Power, Low Cost Cellular Connectivity

LAS VEGAS--(BUSINESS WIRE)-- Skyworks Solutions, Inc. (NASDAQ: SWKS), an innovator of high performance analog semiconductors connecting people, places and things, today unveiled its next generation LTE Category M-1 and NB-1 front-end solutions targeting machine-to-machine and Internet of Things applications requiring embedded cellular connectivity. Skyworks' newest multiband modules leverage half-duplex RF operation to deliver a highly integrated, turn-key solution that addresses Release 13 specifications of the 3GPP LTE standard - providing dependable, secure, low power connectivity in a compact package. These innovative products allow OEMs to simplify the design process, shorten development time, meet operator requirements worldwide and significantly accelerate time to market.

"With leading cellular network operators announcing plans to enable the latest IoT standards on their networks in 2017, Skyworks is pleased to be pushing the performance envelope and offering our customers a single SKU, low-cost LTE solution that operates over multiple frequency bands and supports migration from 2G," said Carlos Bori, vice president of sales and marketing for Skyworks. "Skyworks' modules are powering wireless cellular communications for applications such as wearables, action cameras, smart meters and other consumer IoT devices requiring LTE connectivity as well as paving the way for 5G machine-to-machine communication networks."

According to GSMA, cellular machine-to-machine connections are expected to grow from approximately 300 million devices today to as many as two billion by 2020. More broadly, IHS forecasts the IoT market will grow from an installed base of 15 billion devices in 2015 to 31 billion devices in 2020.

About Skyworks' LTE Front-end Modules for IoT

The [SKY68000](#), which was released earlier last year, is a hybrid RF front-end (RFFE) module supporting cellular LTE bands 4 and 13 for Category M-1 and NB-1 (half-duplex) transceiver platforms.

The [SKY68001](#) is a hybrid, universal multiband RFFE module supporting cellular LTE Category M-1 and NB-1 (half-duplex) transceiver platforms covering more than 15 bands.

The [SKY68011](#) is a hybrid, multiband RFFE module supporting cellular LTE for Category M-1 and NB-1 (half-duplex) transceiver platforms covering more than eight bands.

Engineering samples are available now with production commencing in first half of 2017. Please visit [Skyworks LTE Front-](#)

[end Modules](#) for more information.

Skyworks at CES

Skyworks will be hosting meetings at CES in the Las Vegas Convention Center, South Hall, Meeting Room MP25671.

About Skyworks

Skyworks Solutions, Inc. is empowering the wireless networking revolution. Our highly innovative analog semiconductors are connecting people, places and things spanning a number of new and previously unimagined applications within the automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearable markets.

Skyworks is a global company with engineering, marketing, operations, sales and support facilities located throughout Asia, Europe and North America and is a member of the S&P 500® and Nasdaq-100® market indices (NASDAQ: SWKS). For more information, please visit Skyworks' website at: www.skyworksinc.com.

Safe Harbor Statement

Any forward-looking statements contained in this press release are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. Forward-looking statements include without limitation information relating to future events, results and expectations of Skyworks. Forward-looking statements can often be identified by words such as "anticipates," "expects," "forecasts," "intends," "believes," "plans," "may," "will" or "continue," and similar expressions and variations (or negatives) of these words. Actual events and/or results may differ materially and adversely from such forward-looking statements as a result of certain risks and uncertainties including, but not limited to, the quality of our products and any remediation costs; shorter-than-expected product life cycles; lengthy product development cycles that impact the timing of new product introductions; our ability to timely and accurately predict market requirements and evolving industry standards and to identify opportunities in new markets; and other risks and uncertainties identified in the "Risk Factors" section of Skyworks' most recent Annual Report on Form 10-K (and/or Quarterly Report on Form 10-Q) as filed with the Securities and Exchange Commission ("SEC"). Copies of Skyworks' SEC filings can be obtained, free of charge, on Skyworks' website (www.skyworksinc.com) or at the SEC's website (www.sec.gov). Any forward-looking statements contained in this press release are made only as of the date hereof, and we undertake no obligation to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
