Please visit the Events and Presentations page in the Investor Center of the Company's website: <http://ir.synthesisenergy.com/events.cfm>.

### About Synthesis Energy Systems, Inc.

Synthesis Energy Systems (SES) is a Houston-based technology company focused on bringing clean high-value energy to developing countries from low-cost and low-grade coal, biomass and municipal solid waste through its proprietary gasification technology based upon U-Gas®, licensed from the Gas Technology Institute. The SES Gasification Technology (SGT) can produce clean, low-cost syngas for power generation, industrial fuels, chemicals, fertilizers, and transportation fuels, replacing expensive natural gas based energy. SGT can also produce high-purity hydrogen for cleaner transportation fuels. SGT enables Growth With Blue Skies, and greater fuel flexibility for both large-scale and efficient small- to medium-scale operations close to fuel sources. Fuel sources include low-rank, low-cost high ash, high moisture coals, which are significantly cheaper than higher grade coals, many coal waste products, biomass, and municipal solid waste feedstocks.
