

Syntel Named a Leader in Healthcare IT Services

Named to Healthcare Informatics 100 for the Eighth Straight Year

TROY, Mich., June 3, 2010 (GLOBE NEWSWIRE) -- Syntel, Inc. (Nasdaq:SYNT), a global information technology services and Knowledge Process Outsourcing (KPO) firm, today announced that it has been ranked #58 on the 2010 "Healthcare Informatics 100," a list of the 100 leading global healthcare IT providers.

"We are very pleased to be recognized as one of the top 100 healthcare technology providers, and Syntel has achieved excellent growth in the healthcare industry over the past year," said Syntel's CEO and President, Prashant Ranade. "Our growth has been driven by demand for our integrated suite of industry-focused IT and KPO services, and we have made significant investments in new service offerings like records management KPO and ICD-10 migration."

"We recently added our first healthcare KPO client, are now enabling this global pharmaceutical company to process and archive 30,000 to 40,000 clinical trial documents each month with 100% accuracy and dramatically lower cost."

"Our best-in-class ICD-10 migration methodology is a phased approach that not only assures regulatory compliance, but also enables enterprises to undergo a transformation to open up innovative new uses for data including robust research and analytics, predictive modeling and fraud management," said Ranade.

Healthcare is a key focus area for Syntel, and the Company also provides [targeted solutions](#) for payers, providers, and pharmaceutical firms, such as provider analytics, medical banking, disease and care management, mobility solutions, clinical data management, Pharmcovigilance, and e-detailing.

In its 17th edition, the "Healthcare Informatics 100" list ranks the top 100 healthcare technology providers by revenue. The article appears in the June 2010 issue of *Healthcare Informatics* magazine.

About Healthcare Informatics

Healthcare Informatics is the only publication focused solely on servicing the acute-care C-suite IT leaders. It covers best practices for system selection, contract negotiation, implementation and integration, as well as strategic management issues, such as governance, staffing, budgeting, and change management. Healthcare Informatics and its Web site are divided into six areas of content — clinical, financial, administrative, wireless, imaging, and policy.
