

Raymond James Technology Investors Conference

Chuck Dannewitz
Executive Vice President & CFO

December 9, 2015

Forward-Looking Statements

Certain statements made in this document are “Forward-Looking Statements” as described in the Private Securities Litigation Reform Act of 1995. These statements are subject to risks and uncertainties further described in Tech Data Corporation’s (the “Company”) Annual Report on Form 10-K filed March 26, 2015, a copy of which can be obtained from the Company’s Investor Relations website at www.techdata.com/investor. A number of important factors, some of which are beyond the Company’s control, could cause actual events and results to differ materially from those contained in or implied by the forward-looking statements. Forward-looking statements reflect management’s analysis as of the filing date of this presentation. The Company does not undertake to update or revise these statements to reflect subsequent developments.

Non-GAAP Financial Information

This document includes financial results prepared in accordance with generally accepted accounting principles (“GAAP”). In addition to GAAP results, Tech Data management believes that the presentation of non-GAAP financial measures is useful to investors because it provides investors with a more complete understanding of our operational results and a meaningful comparison of our performance between periods. The non-GAAP results should only be used in conjunction with results reported in accordance with GAAP and are not intended to be a substitute for results reported in accordance with GAAP. Non-GAAP financial measures presented in this presentation or other presentations, press releases and similar documents issued by Tech Data, include but are not limited to sales, income or expense items as adjusted for the impact of changes in foreign currencies (referred to as “constant currency”) , sales adjusted for the impact of the exit of certain country operations, non-GAAP selling, general and administrative expenses (“SG&A”), non-GAAP operating income, non-GAAP operating margin, non-GAAP net income, non-GAAP earnings per diluted share and Return on Invested Capital. These non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similar measures presented by comparable companies. Management may also use these non-GAAP financial measures to establish operational goals and, in some cases, for measuring performance for compensation purposes. This presentation provides a detailed reconciliation between results reported in accordance with GAAP and non-GAAP financial measures
