Tech Data Adds Veeam Cloud Connect on Azure to StreamOne Cloud Marketplace

Partners Can Now Easily Extend Veeam Backup Infrastructure to Microsoft Azure with Instant Deployment and Pay-as-you-go Options

CLEARWATER, Fla.--(BUSINESS WIRE)-- [Tech Data Corporation](#) (Nasdaq: TECD) today announced that it has added Veeam Cloud Connect for the Enterprise deployed on Microsoft Azure to the [StreamOne Cloud Marketplace](#), the distributor's platform for end-to-end provisioning and billing of software and cloud services. The offering is available in the U.S. and Europe.

Veeam Cloud Connect for the Enterprise makes it easy for Veeam customers to extend their backup infrastructure to different clouds, and for service providers to offer both Backup-as-a-Service or complete availability solutions. Veeam software allows customers to maintain full control of their data through easily scheduled and managed backups to Azure that apply appropriate archiving and retention policies to meet their specified requirements. Its end-to-end encryption ensures that data is always secure, at source and in transit.

"StreamOne is rapidly becoming the aggregation and management platform of choice for cloud partners, and with the addition of Veeam Cloud Connect for the Enterprise it becomes an even more useful and convenient platform," said Michael Urban, corporate vice president, Strategy, Transformation and Global Vendor Management at Tech Data. "Using Veeam Cloud Connect on Azure gives customers the peace of mind that their data is protected by market-leading technologies. The recent high-profile ransomware attacks have underlined the critical nature of ensuring availability and rigidly imposing that discipline."

Customers can now automatically deploy a trial version of Veeam Cloud Connect for the Enterprise on Azure. Following the trial period, customers can purchase a license key that will deliver a fully-featured version.
