Vonage Receives Two Product of the Year Awards

HOLMDEL, N.J., March 12, 2015 /PRNewswire/ -- Vonage, a leading provider of cloud communications services for consumers and businesses, earned two awards in the 2015 TMC INTERNET TELEPHONY Product of the Year Award competition.

Recognizing the Company's innovative communications offerings, the mobile inbound calling functionality of the Vonage® Extensions® App and the Dell Business Phone powered by Vonage Business Solutions™ were honored with the awards.

The 16th annual INTERNET TELEPHONY Product of the Year Awards recognize companies that have developed exceptional VoIP and IP Communications products and services.

"Vonage has played a key role transforming the way consumers and businesses communicate, and we are honored to have that innovation recognized at this year's INTERNET TELEPHONY Awards," said Joe Redling, Vonage Chief Operating Officer. "These exceptional products are two examples of how we listen and respond to market needs in forward-thinking ways."

The mobile inbound calling functionality, part of the patented Vonage Extensions App, is standard on all Vonage residential service plans. With the addition of mobile inbound calling to Vonage Extensions, customers can use their home phone plan to make and receive calls on up to two iPhone® or Android™ smartphones over a WiFi or data connection₁. Vonage Extensions also allows subscribers to use a shared family home phone number as the caller ID on their smart phone. This ensures customers never miss a call, can keep their mobile numbers private and can make low-cost international calls from anywhere.

With the introduction of the Dell Business Phone powered by Vonage Business Solutions™, Vonage's technology is being used to power third-party communications solutions to serve any size enterprise. The Dell Business Phone is offered as a value added feature of the Dell Mobile Workspace product. This feature unlocks access to a wireless-carrier-agnostic cloud-based communications service that provides a separate business line on personal smartphones and tablets, allowing companies to seamlessly transition into BYOD with increased security and control while saving on IT expenses.

The winners of the 2015 INTERNET TELEPHONY Product of the Year are featured in INTERNET TELEPHONY magazine and online at www.itmag.com.

About Vonage

Vonage (NYSE: VG) is a leading provider of cloud communications services for consumers and businesses. Vonage provides a robust suite of feature-rich residential and business communication solutions that offer flexibility, portability and ease-of-use, designed to meet the needs of a wide range of customers from individuals to large businesses.

Vonage residential service (www.vonage.com) for individuals and families, and Vonage Business Solutions service (www.vonagebusiness.com) for small and medium businesses, run over the top of a customer's existing broadband connection. Through Telesphere (www.telesphere.com), Vonage offers service with carrier-grade performance over a private national MPLS broadband network, which is especially well suited to address the needs of larger businesses with multiple offices that require higher service level agreements (SLAs).

Vonage Holdings Corp. is headquartered in Holmdel, New Jersey. Vonage® is a registered trademark of Vonage Marketing LLC, owned by Vonage America Inc.
