ViaSat, AirSatOne Partner on Bringing High-Speed, Global Connectivity to Large Cabin Business Jets

AirSatOne to Offer Competitive Airtime Packages for ViaSat's In-flight Internet Service and Operational Support

GENEVA, May 22, 2017 /PRNewswire/ -- **(EBACE, European Business Aviation Convention & Exhibition, ViaSat Stand #T100)** -- [ViaSat Inc.](#) (NASDAQ: VSAT), a global broadband services and technology company announced today [AirSatOne](#), a satellite communications (satcom) service provider for aviation, has become a new reseller partner for the ViaSat in-flight internet service to large-cabin, business aviation aircraft. AirSatOne will offer competitive airtime packages and provide support for aircraft operators.

ViaSat is a trusted brand in the business aviation market, offering world-class connectivity solutions for over a decade. The Company offers innovative in-flight internet products that let business travelers be more productive and entertained in the air; a commitment to customer service; and a mature, reliable network. AirSatOne will have immediate access to resell ViaSat's range of business aviation products that deliver [coverage to more than 90% of the world's most popular flight paths](#), ensuring optimal user experiences over the most congested travel routes.

"We are extremely pleased to be able to offer the ViaSat service as part of our growing portfolio," said Jo Kremsreiter, president of AirSatOne. "ViaSat offers fast, reliable in-flight internet services that enable passengers and crew to do more on board. We will marry their innovative connectivity service with our expert support and work with MRO's and OEM's to successfully bring connectivity and new bandwidth-focused applications to the aircraft."

Ken Peterman, president, Government Systems at ViaSat continued, "We are committed to providing travelers the ability and freedom to stay connected when in flight—on any aircraft, anywhere in the world. Our partnership with AirSatOne will empower business jet passengers to have an enhanced travel experience where they have access to email, voice and texting as well as the internet for streaming entertainment."

AirSatOne has a highly trained, experienced team that specializes in aviation satcom. The team will provide support to ViaSat customers 24/7 onsite at the customer's facilities, at the AirSatOne facilities located at the Spirit of Saint Louis Airport (SUS) in Chesterfield Missouri, or via phone.

About ViaSat's Business Aviation Service

ViaSat's near-global, in-flight connectivity network for business aviation is a proven, reliable satellite network, in operation since 2008. It gives thousands of business jets, commercial airlines, heads of state, and maritime vessels near-global connectivity coverage. Business travelers benefit from ViaSat's continuous investment in network coverage, security, operations and data capacity. ViaSat also has a path to unveil its Ka-band internet service globally, which is expected to offer the fastest speeds and best-in-market pricing for the business jet market.

About AirSatOne

AirSatOne is a Satcom service provider that specializes in aircraft satcom, both for the cabin and the flight deck. Customers include business jet operators, VVIP, heads of state and other government officials. AirSatOne's government and special mission customers use its services on airborne assets used for border patrol, aerial surveillance, UAV operations and other specialized activities. The Company is a technical solutions company, and offers advanced connectivity solutions including aircraft network security, advanced firewall protection, filtering, on-line data management, ISDN, IPsec, VPN Tunnel, MPLS and government grade encryption. The Company also offers Flight Deck Connect™, which includes datalink and safety services, including FANS 1/A equipment and systems testing over the live ACARS global network in support of MRO and OEM Supplemental Type Certificate (STC) or Type Certificate (TC) programs. AirSatOne also offers flight crew training the flight crew in support of operational approval.
