WebMD Health Sets New Record for Online Continuing Medical Education (CME)

More than 625,000 credit hours logged in 2003, a 93% increase over 2002 –

New York, NY (February 24, 2004) – WebMD Health, the leading provider of online health information for consumers and physicians, today announced that it's professional portal, *Medscape from WebMD* has reported a new record for online CME credits. In 2003, physicians and healthcare professionals earned 629,000 CME credits at Medscape, an increase of 93% over 2002.

"The significant increase can be attributed, in part, to Medscape's significant growth in it's physician user base throughout the year, as well as the introduction of several important CME features, including CME Live, News CME and enhancements to our CME tracker," said Steve Zatz, M.D., EVP, Professional Information Services and Chief Medical Officer, WebMD Corporation.

New offerings include:

- CME Live provides real time webcasts of CME programs on key topics and conditions, designed to educate healthcare professionals about timely clinical issues. These webcasts combine streaming audio and slide presentations and allow participants to interact with faculty and respond to poll questions that assess the current state of knowledge and practice
- News CME is a daily, quarter hour CME activity that is associated with an original Medscape news article posted each business day.
- Medscape's CME Tracker is an online record that automatically logs all Medscape CME and CE activities completed online. The American Medical Association accepts Medscape's CME Tracker from physicians claiming category 1 credit toward the AMA Physician's Recognition Award.

Dr. Zatz continued: "Physicians and other healthcare professionals have come to rely on Medscape as their primary source for timely clinical information and online education with the depth, breadth, and validity needed to improve the practice of medicine."

Medscape from WebMD offers specialists, primary care physicians, and other health professionals the Internet's most robust and integrated online medical information and educational tools. Medscape is organized by medical specialty, and there are more than 25 individual specialty sites. Features include original content and medical news, over 275 online CME activities, conference coverage of over 100 medical meetings annually, the Internet's first primary-source medical journal, Medscape General Medicine, a free subscription to Medscape's MedPulse®, our weekly email newsletter that highlights what's new in your specialty on Medscape, as well as Medline and more.

Earlier this year, WebMD announced that it had acquired Physicians' Online, a physicians' portal for authenticated, professional medical communications, peer-to-peer discussions, and comprehensive medical information.
