

## SurfControl Web Filter Appliance Now Offers Microsoft ISA Server 2006 Support for Unrivaled and Intuitive Threat Protection

### New Support is Ideal for Small to Medium Businesses

ORLANDO, Fla. - Tech Ed - June 4 2007 - SurfControl (LSE: SRF), a leading provider of global on-demand, network, and endpoint IT security solutions, announced the release of the SurfControl Web Filter Appliance with Microsoft ISA 2006 support. The ready-to-deploy solution, offers organizations a tool to enhance security, network performance, productivity and business compliance.

"We are proud to work with Microsoft to provide this best-of-breed security solution," said Rocco Donnino, vice president of WW Business Development. "SurfControl Web Filter Appliance with Microsoft ISA Server 2006 support is an out of the box solution that will enable businesses of all sizes, and particularly small to medium businesses, to defend their organization from threats."

SurfControl Web Filter Appliance with Microsoft ISA Server 2006 support provides protection beyond URL filtering for security against related threats such as instant messaging, streaming media, and file downloads and Web-based email. The Web Filter Appliance is ideal for small to medium businesses and organizations with branch office scenarios because the appliance is easy and ready to use, and requires little maintenance.

SurfControl Web Filter on the ISA Server 2006 platform is a valuable addition to our customer's security needs," said Todd Greenberg, Group Product Manager, security and access products at Microsoft. "SurfControl's expertise in Web security brings an important extra layer of security to our ISA Server customers."

Organizations also receive SurfControl's unrivaled threat protection with the SurfControl Web Filter Appliance. SurfControl's global sensory network feeds into Web Filter's Internet Threat Database and Virtual Control Agent to provide zero-day, focused threat categories including International and multi-cultural content and dynamic categorization of unknown Web sites. These key features allow for the implementation of effective policy rules unique to each organization to reduce risk, enable business compliance and ensure business continuity.

#### *About SurfControl*

SurfControl provides a portfolio of security solutions to protect our customers from Internet threats, deliver business and regulatory compliance, and enable business continuity. SurfControl believes that security should be treated as a science, delivering protection at multiple points -- "in the cloud" with on-demand security services, on the network with software and appliances, and on the desktop and mobile client. All of SurfControl's solutions for Web, e-mail and endpoint security are backed by industry-leading threat detection technologies, delivered by SurfControl's Global Threat Experts who work 24/7 to provide customers with dynamic zero-day protection. The company protects more than 16 million users and over 25,000 customers worldwide, and employs more than 600 people in offices across Europe, the Americas, and Asia/Pacific.
