Consolidated Operating Results

For the first quarter of 2010, revenue was \$599.8 million compared to \$607.0 million for the same quarter last year, a decrease of 1.2 percent. Revenue from acquired entities² was \$2.8 million during the first quarter of 2010.

First quarter revenue was impacted by a reduction of \$24.3 million from businesses in which the Company is decreasing its exposure or has exited. Foreign currency exchange rates also negatively impacted revenue in the first quarter by \$2.9 million compared to the rates used for 2010 guidance.

"We had record operating income of \$117.2 million and record operating margin of 19.5 percent in the first quarter," said CFO, Paul Mendlik. "We also had very strong cash flows from operations of \$115.5 million. \$55 million of the \$66.6 million increase in cash flows from operations is due to changes in working capital primarily related to accrued expenses and accounts payable."

Adjusted EBITDA for the first quarter of 2010 was \$166.8 million, or 27.8 percent of revenue, compared to \$163.6 million, or 27.0 percent of revenue, for the first quarter of 2009. A reconciliation of Adjusted EBITDA to cash flows from operating activities is presented below.

Reconciliation of Financial Measures

The common definition of EBITDA is "Earnings Before Interest Expense, Taxes, Depreciation and Amortization." In evaluating liquidity, we use earnings before interest expense, share based compensation, taxes, depreciation and amortization, minority interest, non-recurring litigation settlement costs, other non-cash reserves, transaction costs and after acquisition synergies and excluding unrestricted subsidiaries, or "Adjusted EBITDA." EBITDA and Adjusted EBITDA are not measures of financial performance or liquidity under generally accepted accounting principles ("GAAP"). EBITDA and Adjusted EBITDA should not be considered in isolation or as a substitute for net income, cash flows from operations or other income or cash flows data prepared in accordance with GAAP. Adjusted EBITDA, as presented, may not be comparable to similarly titled measures of other companies. Adjusted EBITDA is presented as we understand certain investors use it as one measure of our historical ability to service debt. Adjusted EBITDA is also used in our debt covenants, although the precise adjustments used to calculate Adjusted EBITDA included in our credit facility and indentures vary in certain respects among such agreements and from those presented below. Set forth below is a reconciliation of EBITDA and Adjusted EBITDA to cash flows from operations.
