

Fourth Quarter Fiscal Year 2017

Company Overview

Xilinx develops All Programmable technologies and devices, beyond hardware to software, digital to analog, and single to multiple die in 3D ICs. These industry leading devices are coupled with a next-generation design environment and IP to serve a broad range of customer needs, from programmable logic to programmable systems integration. Xilinx products provide a revolutionary alternative to custom logic chips that require weeks or months of design time.

As a "fabless" semiconductor company, Xilinx does not own or operate silicon wafer production facilities. Rather, the Company forms strategic alliances with chip manufacturers. This strategy allows Xilinx to focus on research and development, marketing, and technical support, while having access to the most advanced chip processing technologies currently available.

Xilinx Quick Facts

NASDAQ Stock Symbol:	XLNX
12-Month Closing Stock Price Range:	\$42.92-\$61.24
Number of Employees:	~ 3,831
Number of Patents:	~4,000

End Market Applications

Communications & Data Center Equipment

Enterprise Routers,
Metro Optical Networks,
Data Centers

Wireless Infrastructure

Industrial & A&D

Instrumentation
Aerospace & Defense,
Scientific & Medical

Broadcast, Consumer & Auto

Driver Assist
Digital TV, Augmented Reality
Studio Broadcast

Select Customers

Communications & Data Center Equipment

Cisco, Ericsson,
Huawei, Samsung

Industrial & A&D

Raytheon, Agilent
General Dynamics

Broadcast, Consumer & Auto

Sony, Harman,
Evertz

Programmable Logic Overview

In the digital world, there are two types of electronic chips: memory and logic. Memory chips are used to store information. Logic chips are used to manipulate, or interface with, the information contained in memory.

Programmable Logic Devices (PLDs) are "off the shelf" logic chips that the customer, rather than the chip manufacturer, programs to perform a specific function. With the ability to program their own chips, customers realize two key benefits: product design flexibility and faster time to market. Given today's shorter product life cycles, both of these factors can be critical determinants of a product's ultimate success. Electronic equipment manufacturers rely upon PLDs to make fast design changes, accommodate uncertain production volumes and accelerate the introduction of their products to the market place.

Revenue Breakdown

Revenue by Geography

Revenue by End Market

Revenue by Product Category

Revenue (\$M)

GAAP Operating Income (\$M)

GAAP Net Income (\$M)

Financial Highlights for FY Ended March 31st

Income Statement (\$M)	2017	2016	2015	2014	2013
Net Revenues	2,349	2,214	\$2,377	\$2,383	\$2,169
Gross Margin	70%	70%	70%	69%	66.0%
Operating Margin	30%	30%	32%	31%	27%
Profit Margin	27%	25%	27%	27%	23%
Diluted EPS	\$2.32	\$2.05	\$2.35	\$2.19	\$1.79
Diluted Shares Outstanding (M)	269	269	276	287	273

Balance Sheet (\$M)

Total Assets	4,740	\$4,823	\$4,898	\$5,034	\$4,730
Long-Term Debt	\$995	\$996	\$995	\$994	\$923
Stockholders' Equity	\$2,507	\$2,590	\$2,612	\$2,751	\$2,963

Valuation Ratios

	Mar-17	Dec-16	Sept-16	Jun-16	Mar-16
Inventory Days (Qtr. ending)	111	105	102	106	92
Days Sales Outstanding	36	53	36	34	49
Rev/Employee (\$K) 12 mo. Avg.)	643	648	656	650	649
ROE%	24%	25%	25%	25%	21%
