

eBay Inc.
Non-GAAP Measures of Financial Performance

To supplement the company's condensed consolidated financial statements presented in accordance with generally accepted accounting principles, or GAAP, eBay uses non-GAAP measures of certain components of financial performance. These non-GAAP measures include non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP operating margin, non-GAAP effective tax rate, and free cash flow.

These non-GAAP measures are not in accordance with, or an alternative to, measures prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with eBay's results of operations as determined in accordance with GAAP. These measures should only be used to evaluate eBay's results of operations in conjunction with the corresponding GAAP measures.

Reconciliation to the nearest GAAP measure of all non-GAAP measures included in this press release can be found in the tables included on pages 12, 14 and 15 of this press release.

These non-GAAP measures are provided to enhance investors' overall understanding of the company's current financial performance and the company's prospects for the future. Specifically, the company believes the non-GAAP measures provide useful information to both management and investors by excluding certain expenses, gains and losses, and net purchases of property and equipment that may not be indicative of its core operating results and business outlook. In addition, because eBay has historically reported certain non-GAAP results to investors, the company believes the inclusion of non-GAAP measures provides consistency in the company's financial reporting.

For its internal budgeting process, and as discussed further below, eBay's management uses financial statements that do not include stock-based compensation expense, employer payroll taxes on stock-based compensation, amortization or impairment of acquired intangible assets, impairment of goodwill, significant gains or losses on from the disposal of a business, restructuring-related charges and the income taxes associated with the foregoing. In addition to the corresponding GAAP measures, eBay's management also uses the foregoing non-GAAP measures in reviewing the financial results of eBay.

eBay excludes the following items from non-GAAP net income, non-GAAP earnings per diluted share, non-GAAP operating margin and non-GAAP effective tax rate:

Stock-based compensation expense. This expense consists of expenses for stock options, restricted stock and employee stock purchases. eBay excludes stock-based compensation expenses from its non-GAAP measures primarily because they are non-cash expenses that management does not believe are reflective of ongoing operating results.

Employer payroll taxes on stock-based compensation. This amount is dependent on eBay's stock price and the timing and size of exercises by employees of their stock options and the vesting of their restricted stock, over which management has limited to no control, and as such management does not believe it correlates to eBay's operation of the business.

Amortization or impairment of acquired intangible assets, impairment of goodwill and significant gains or losses from the disposal of a business. eBay incurs amortization or impairments of acquired intangible assets and goodwill in connection with acquisitions and may incur significant gains or losses from the disposal of a business. eBay excludes these items because they arise from eBay's prior acquisitions and management does not believe it has any direct correlation to the current operating results of eBay's business.

Restructuring. These charges consist of expenses for employee severance and other exit and disposal costs. eBay excludes restructuring charges primarily because management does not believe they are reflective of ongoing operating results.

Income taxes associated with certain non-GAAP entries. This amount is used to present stock-based compensation and the other amounts described above on an after-tax basis consistent with the presentation of non-GAAP net income.

In addition to the non-GAAP measures discussed above, eBay also uses free cash flow. Free cash flow represents operating cash flows less net purchases of property and equipment. eBay considers free cash flow to be a liquidity measure that provides useful information to management and investors about the amount of cash generated by the business after the purchases of property, buildings, and equipment, which can then be used to, among other things, invest in eBay's business, make strategic acquisitions, and repurchase stock. A limitation of the utility of free cash flow as a measure of financial performance is that it does not represent the total increase or decrease in the company's cash balance for the period.
