

STAMPS.COM ANNOUNCES VERSION 8.5, FEATURES ECOMMERCE PLATFORM INTEGRATIONS TO EASILY PRINT SHIPPING LABELS

LOS ANGELES - Sept. 29, 2009 - Stamps.com® (Nasdaq:STMP), the leading provider of [postage online](#) and [shipping software](#) solutions to approximately 400,000 customers, today announced the release of Version 8.5 of its PC Postage® software. Version 8.5 has advanced features that enable managers of online webstores to automatically import, manage and fulfill orders via the Stamps.com interface. Stamps.com's webstore capabilities allow a user to retrieve order data, print shipping labels and automatically post order status details such as tracking numbers and cost data back to the user's ecommerce store.

"Our new PC Postage Version 8.5 represents the most comprehensive set of web order management tools available from a single source, as well as the only one available from a USPS licensed postage vendor," said Stamps.com president and CEO Ken McBride. "We believe that the advanced capabilities of Version 8.5 coupled with the deep cost savings represented by a one vendor solution, represents the most compelling product offering available in the industry today."

Additional features of Version 8.5 include the ability to print batch orders from XML files, process domestic and international shipping requests from a single interface and make inline edits and receive real time error information when orders are not ready to be printed. Version 8.5 also has advanced search capabilities that allow the user to search through the entire order history based on any field or even a combination of fields.

PC Postage Version 8.5 is available immediately for download at www.stamps.com/download.
